

# ISO 9845-1:1992-10 (E)

**Solar energy; reference solar spectral irradiance at the ground at different receiving conditions; part 1: direct normal and hemispherical solar irradiance for air mass 1,5**

---

<b>Contents</b>	<b>Page</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Definitions</b> .....	<b>1</b>
<b>3 Application of the spectral data for deriving effective solar irradiances and solar spectrum weighted quantities</b> .....	<b>2</b>
<b>4 Validation of accuracy</b> .....	<b>2</b>
<b>5 Standard data of direct normal solar irradiance, hemispherical solar irradiance on an equator-facing, 3r tilted plane and normalized hemispherical solar irradiance</b> .....	<b>3</b>
<b>Annexes</b>	
<b>A Atmospheric parameters of the model atmosphere</b> .....	<b>10</b>
<b>B Computational technique for tabulated values derived from the spectral irradiance</b> .....	<b>11</b>
<b>C Plots of solar irradiance</b> .....	<b>12</b>
<b>D Bibliography</b> .....	<b>14</b>
