

DIN EN 12977-5:2012-06 (E)

Thermal solar systems and components - Custom built systems - Part 5: Performance test methods for control equipment

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	7
3	Terms and definitions	8
4	Symbols and abbreviations	9
5	Controller classification (including equipment classification)	9
5.1	Controller	9
5.2	Sensor	10
5.3	Actuator	10
6	Requirements	11
6.1	General requirements	11
6.2	Controllers, system clocks, timers and counters	12
6.3	Sensors	12
6.4	Indicators	15
6.5	Actuators	15
6.6	Initial operation and commissioning	16
6.7	Documentation	16
7	Testing of sensors	17
7.1	General	17
7.2	Testing of temperature sensors	17
7.3	Testing of solar irradiance sensors	21
7.4	Testing of further sensors and measuring equipment	25
8	Testing of system clocks, timers and counters	25
8.1	General	25
8.2	Test equipment	25
8.3	Installation of system clocks, timers and counters	25
8.4	Test procedure	26
8.5	Data processing and evaluation	26
9	Function testing of simple differential thermostats	27
9.1	General	27
9.2	Test equipment	27
9.3	Installation of differential thermostats and/or sensors	29
9.4	Test procedure	29
10	Function testing of multi-function controllers	31
10.1	General	31
10.2	Principle of multi-function controller testing	32
10.3	Intellectual property of the manufacturer	32
10.4	Test facility for multi-function controller testing	32
10.5	Preliminary steps when using a test facility provided with an input/output emulator	34

10.6	Test procedure	37
10.7	Data acquisition and processing	39
11	Testing of actuators and additional control equipment	40
11.1	General	40
11.2	Determination of the electric power consumption of actuators and further components ..	40
11.3	Measuring the electric power of pumps with varying power consumption	40
12	Documentation	40
12.1	General	40
12.2	General information	40
12.3	Marking	40
12.4	Information for the installer, assembly and installation	41
12.5	Information for the user, operation and maintenance	41
13	Test report	42
Annex A (informative) Testing the electrical supply voltage dependence of control equipment		43
A.1	General	43
A.2	Test equipment	43
A.3	Test procedure	43
A.4	Data processing	44
