

ISO 11855-4:2012-08 (E)

Building environment design - Design, dimensioning, installation and control of embedded radiant heating and cooling systems - Part 4: Dimensioning and calculation of the dynamic heating and cooling capacity of Thermo Active Building Systems (TABS)

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols and abbreviations	1
5	The concept of Thermally Active Surfaces (TAS)	6
6	Calculation methods	11
6.1	General	11
6.2	Rough sizing method	12
6.3	Simplified sizing by diagrams	13
6.4	Simplified model based on finite difference method (FDM)	19
6.4.1	Cooling system	20
6.4.2	Hydraulic circuit and slab	20
6.4.3	Room	22
6.4.4	Limits of the method	24
6.5	Dynamic building simulation programs	25
7	Input for computer simulations of energy performance	25
Annex A (informative) Simplified diagrams		26
Annex B (normative) Calculation method		31
B.1.	Pipe level	31
B.2.	Thermal nodes composing the slab and room	31
B.3.	Calculations for the generic h-th hour	35
B.4	Sizing of the system	41
Annex C (informative) Tutorial guide for assessing the model		42
Annex D (informative) Computer program		44
Bibliography		52
