## Test methods for solar collectors - Part 3: Thermal performance of unglazed liquid heating collectors (sensible heat transfer only) including pressure drop

---

<b>Contents</b>		<b>Page</b>
1	Scope .....	1
2	Normative references .....	1
3	Definitions .....	2
4	Symbols and units.....	2
5	Collector mounting and location .....	2
6	Instrumentation .....	4
7	Test Installation .....	8
8	Outdoor steady-state efficiency test .....	11
9	Steady-state efficiency test using a solar irradiance Simulator.....	15
10	Determination of the effective thermal capacity and time constant of a collector.....	16
11	Determination of the pressure drop across a collector .....	18
<b>Annexes</b>		
A	Format sheets for test data.....	20
B	Collector incident angle modifier .....	31
C	Unglazed solar collector characteristics .....	33
D	Properties of water .....	35
E	Bibliography .....	36
