European foreword 7

Introduction 8

1 Scope 11

2 Normative references 14

3 Terms and definitions 14
3.1 Thermal solar systems 14
3.2 Photovoltaic systems 16

4 Symbols and abbreviations 16
4.1 Symbols 16
4.2 Subscripts 17

5 Description of the methods 18
5.1 Method 1 - solar thermal applications, using system test data 18
5.2 Method 2 - monthly solar thermal applications, using component test data 19
5.3 Method 3 - hourly solar thermal applications 19
5.4 Method 4 - photovoltaic - yearly method 19
5.5 Method 5 - photovoltaic - monthly method 19
5.6 Method 6 - photovoltaic - hourly method 19

6 Methods 19
6.1 Solar thermal applications 19
6.1.1 Method 1 - using system test data 19
6.1.2 Method 2 - monthly, using component specifications 24
6.1.3 Method 3 - hourly, using component specifications 36
6.2 Solar photovoltaic systems 42
6.2.1 General 42
6.2.2 Method 4 - photovoltaic - yearly method 42
6.2.3 Method 5 - photovoltaic - monthly method 45
6.2.4 Method 6 - photovoltaic - hourly method 48

7 Quality control 53
7.1 Solar thermal applications 53
7.1.1 Method 1 - using system test data 53
7.1.2 Method 2 - monthly, using component specifications 53
7.1.3 Method 3 - hourly, using component specifications 53
7.2 Solar photovoltaic applications 53
7.2.1 Method 4 - photovoltaic - yearly method 53
7.2.2 Method 5 - photovoltaic - monthly method 53
7.2.3 Method 6 - photovoltaic - hourly method 53

8 Compliance check 54
8.1 Solar thermal applications 54
8.1.1 Method 1 - using system test data 54
8.1.2 Method 2 - monthly, using component specifications 54

8.1.3 Method 3 - hourly, using component specifications 54
8.2 Solar photovoltaic applications 54
8.2.1 Method 4 - photovoltaic - yearly method 54
8.2.2 Method 5 - photovoltaic - monthly method 54
8.2.3 Method 6 - photovoltaic - hourly method 54

Annex A (normative) Template for the specification of application data 55

A.1 Method 1 - using system test data 55
A.1.1 Product technical data 55
A.1.2 System design data 55
A.1.3 Operating conditions 55
A.2 Method 2 - monthly, using component specifications 55
A.2.1 Product technical data 55
A.2.1.1 Collector 55
A.2.1.2 Collector pump 56
A.2.1.3 Heat storage 57
A.2.2 System design data 58
A.2.2.1 Type of service 58
A.2.2.2 Location of heat storage tank 59
A.2.2.3 Type solar system layout 59
A.2.2.4 Correction factor collector orientation and shadowing 59
A.2.2.5 Collector loop overall heat loss coefficient 60
A.2.2.6 Efficiency of the collector loop 60
A.2.2.7 Collector pump operation time 61
A.2.2.8 Pipe insulation back up heater loop 61
A.2.2.9 Back up heater operation 61
A.2.2.10 Space heating distribution return Heat storage 62
A.2.2.11 Recoverable part of the heat losses 62
A.2.2.12 Correlation factors 62
A.2.2.13 Correction factor 63
A.2.2.14 Air temperature heated room 63
A.2.2.15 Domestic hot water temperature 63
A.2.3 Operating conditions 64
A.2.3.1 Solar irradiance 64
A.2.3.2 Cold water and outside air temperature 64
A.2.3.3 Heat use for water heating 65
A.2.3.4 Design temperature settings 65
A.2.3.5 Back-up heaters 65
A.3 Method 3 - hourly, using component specifications 66
A.3.1 Product technical data 66
A.3.1.1 General 66
A.3.1.2 Collector 66
A.3.1.3 Collector pump and control 66
A.3.2 System design data 67
A.3.2.1 Collector tilt and orientation 67
A.3.2.2 Installed collector area 67
A.3.2.3 Solar loop mass flow rate 67
A.3.2.4 Location of the collector loop piping 67
A.3.2.5 Heat losses of the collector loop 68
A.3.3 Calculations 68

Annex B (informative) Default application data 69

B.1 Method 1 - using system test data 69
B.1.1 Product technical data 69
B.1.2 System design data 69
B.1.3 Operating conditions 69
B.2 Method 2 - monthly, using component specifications 69
B.2.1 Product technical data 69
B.2.1.1 Collector 69
B.2.1.2 Collector pump 70

B.2.1.3 Heat storage 71
B.2.2 System design data 72
B.2.2.1 Type of service 72
B.2.2.2 Location of heat storage tank 73
B.2.2.3 Type solar system layout 73
B.2.2.4 Correction factor collector orientation and shadowing 73
B.2.2.5 Collector loop overall heat loss coefficient 74
B.2.2.6 Efficiency of the collector loop 74
B.2.2.7 Collector pump operation time 75
B.2.2.8 Pipe insulation back up heater loop 75
B.2.2.9 Back up heater operation 75
B.2.2.10 Space heating distribution return Heat storage 76
B.2.2.11 Recoverable part of the heat losses 76
B.2.2.12 Correlation factors 76
B.2.2.13 Correction factor 77
B.2.2.14 Air temperature heated room 77
B.2.2.15 Domestic hot water temperature 77
B.2.3 Operating conditions 77
B.2.3.1 Solar irradiance 77
B.2.3.2 Cold water and outside air temperature 78
B.2.3.3 Heat use for water heating 79
B.2.3.4 Design temperature settings 79
B.2.3.5 Back-up heaters 79
B.3 Method 3 - hourly, using component specifications 80
B.3.1 Product technical data 80
B.3.1.1 General 80
B.3.1.2 Collector 80
B.3.1.3 Collector pump and control 80
B.3.2 System design data 81
B.3.2.1 Collector tilt and orientation 81
B.3.2.2 Installed collector area 81
B.3.2.3 Solar loop mass flow rate 81
B.3.2.4 Location of the collector loop piping 81
B.3.2.5 Heat losses of the collector loop 82
B.3.3 Calculations 82

Annex C (informative) Solar irradiation on the photovoltaic modules 83

C.1 Annual global solar irradiation 83
C.2 Tilt and orientation conversion factor for calculation of the energy radiation on the photovoltaic module surface 83
C.3 Peak power 85
C.4 System performance factor 85

Annex D (normative) Method selection 86

D.1 Solar thermal applications 86
D.2 Solar photovoltaic applications 86

Annex E (informative) Standards linked to solar systems and components 88

Annex F (informative) Method 2 implementation for Ecodesign and Energy labelling 91

F.1 Introduction 91
F.2 Prescribed settings for method 2 91
F.3 Calculation of auxiliary electricity consumption 93
F.4 Determination of the water heater performance parameters without solar contribution 93
F.4.1 General 93
F.4.2 External boiler-type backup heater 94
F.4.3 External heat pump backup heater 94
F.4.4 Integrated fuel fired heater 95
F.4.5 Electrical immersion heater 96

F.5 Conversion of parameters in this EN to parameters in the regulations 96

Annex ZA (informative) Relationship between this European Standard and the energy labelling requirements of Commission Delegated Regulation (EU) No 811/2013 aimed to be covered 100

Annex ZB (informative) Relationship between this European Standard and the energy labelling requirements of Commission Delegated Regulation (EU) No 812/2013 aimed to be covered 101

Annex ZC (informative) Relationship between this European Standard and the ecodesign requirements of Commission Regulation (EU) No 814/2013 aimed to be covered 102
