European foreword 4

Foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 8

4 Symbols and abbreviations 8

5 Concept of the method to determine the heating and cooling capacity 9

6 Heat exchange coefficient between surface and space 10

7 Simplified calculation methods for determining heating and cooling capacity or surface temperature 12
7.1 Universal single power function 13
7.2 Thermal resistance methods 15

8 Use of basic calculation programmes 17
8.1 Basic calculation programmes 17
8.2 Items to be included in a complete computation documentation 17

9 Calculation of the heating and cooling capacity 18

Annex A (normative) Calculation of the heat flux 19

A.1 General 19
A.2 Reference heating systems 19
A.2.1 General 19
A.2.2 Systems with pipes inside the screed (type A and type C) 20
A.2.3 Systems with pipes below the screed or timber floor (type B) 22
A.2.4 Plane section systems 23
A.2.5 Limits of heat flux 24
A.2.6 Influence of pipe material, thickness of the pipe wall and pipe sheathing on the heat flux 26
A.2.7 Thermal conductivity of screed with fixing inserts 27
A.2.8 Downward heat loss 27
A.3 Heating and cooling surfaces embedded in floors, ceilings and walls 28
A.4 Figures and tables 29

Annex B (normative) General resistance method 42

B.1 General equations 42
B.2 Calculation of Rt for pipes embedded in massive concrete (steady state conditions) 43

B.3 Calculation of Rt for capillary pipes embedded in a layer at the inner surface (steady state conditions) ... 45

Annex C (normative) Pipes embedded in wooden construction ... 48

C.1 Field of application ... 48
C.2 Determination of heat exchange by calculation ... 48
C.2.1 Applicability ... 48
C.2.2 The calculation model General ... 48
C.2.3 Calculation procedure for determination of equivalent heat transmission coefficient ... 49
C.2.4 Calculation procedure for components and element characteristics ... 51

Annex D (normative) Method for verification of FEM and FDM calculation programs ... 56

D.1 Temperature distribution and heat transfer in a typical floor cooling system ... 56

Annex E (normative) Values for heat conductivity of materials and air layers ... 60

E.1 Solid materials ... 60
E.2 Trapped air layers ... 60

Bibliography ... 62
