DIN EN 304:2018-02 (E)

Heating boilers - Test code for heating boilers for atomizing oil burners

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 General conditions for testing 5

5 Measurement accuracies and uncertainties 6

6 Measurements for the heating mode 7
6.1 General 7
6.2 Determination of the nominal heat output 7
6.3 Determination of the boiler efficiency at nominal heat output 7
6.4 Performance of testing 8
6.4.1 General test conditions 8
6.4.2 Draught adjustment 8
6.4.3 Establishment of steady-state conditions 8
6.4.4 Test period 8
6.5 Calculation 8
6.5.1 General 8
6.5.2 Nominal heat output 8
6.5.3 Boiler heat input 8
6.5.4 Boiler efficiency 9
6.6 Determination of the waterside resistance 9
6.7 Determination of the standby heat loss 10
6.7.1 General 10
6.7.2 Standby heat loss method 1 11
6.7.3 Standby heat loss method 2 12
6.8 Efficiency at 30 % of the nominal heat output 14
6.8.1 General 14
6.8.2 Efficiency at 30 % - Method 1 (time dependent method) 14
6.8.3 Efficiency at 30 % - Method 2 (load dependent method) 14
6.9 Auxiliary electricity consumption 15
6.10 Seasonal space heating efficiency 16
6.11 Verification of nominal condensing output 16
6.12 Formation of condensation 16
6.13 Functional test for the temperature sensing control type TR and temperature sensing control type STB on the boiler 16
6.14 Surface temperature 20
6.15 Floor temperatures 20
6.16 Limiting temperature of the test panels 20
6.17 Emission values of NOx and CO 21
6.17.1 General 21
6.17.2 Units 21
6.17.3 Assemblies of a boiler with various burners 21

7 Measurement of the sanitary water production mode 21

8 Test report and other documents 22

Annex A (normative) Calculations for the heating mode 23

A.1 Volume measurement 23
A.2 Calculation of combustion parameters 23
A.3 Determination of air factor () and excess air (e) 27
A.4 Test rigs 28
A.5 Calculation of the nominal heat output PN 29
A.6 Calculation of the heat input 30
A.7 Calculation of efficiency 30
A.8 Calculation of the heat losses qA, qU, qS 32
A.9 Standby heat loss (PStby) 35
A.10 Calculation of the seasonal space heating energy efficiency 37
A.11 Fuel characteristics 38

Annex B (informative) Applicable symbols and units 40

Annex C (informative) Criteria for the adaptation of forced draught burners using liquid fuels to heating boilers 43

Annex D (informative) Information for setting up and evaluation of the test rig 45

Annex E (informative) Determination of the heat losses of the test rig 46

Annex ZA (informative) Relationship between this European Standard and the ecodesign requirements of Commission Regulation (EU) No [813/2013] aimed to be covered 47

Annex ZB (informative) Relationship between this European Standard and the ecodesign requirements of Commission Delegated Regulation (EU) No [811/2013] aimed to be covered 48
