

# DIN EN 303-5:2021-09 (E)

## Heating boilers - Part 5: Heating boilers for solid fuels, manually and automatically stoked, nominal heat output of up to 500 kW - Terminology, requirements, testing and marking

---

<b>Contents</b>		<b>Page</b>
European foreword .....		5
Introduction .....		7
<b>1</b>	<b>Scope .....</b>	<b>8</b>
1.1	General .....	8
1.2	Fuels .....	9
<b>2</b>	<b>Normative references .....</b>	<b>10</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>13</b>
<b>4</b>	<b>Requirements .....</b>	<b>20</b>
4.1	General requirements .....	20
4.1.1	General requirements for all boilers .....	20
4.1.2	General requirements for condensing boilers .....	21
4.2	Construction requirements .....	22
4.2.1	Production documentation .....	22
4.2.2	Heating boilers (parts) made of steel .....	23
4.2.3	Boilers made of cast materials .....	29
4.2.4	Design requirements .....	30
4.2.5	Requirements for boilers with outside combustion air supply and room sealed appliances .....	33
4.3	Safety requirements .....	34
4.3.1	General .....	34
4.3.2	Manual stoked boilers .....	35
4.3.3	Safety against back burning for automatic stoked boilers .....	35
4.3.4	Prevention of the transmission of toxic components .....	38
4.3.5	Safety against fuel overload of the boiler or interruption in fuel supply .....	39
4.3.6	Safety against lack of air supply or insufficient combustion .....	39
4.3.7	Surface temperatures .....	40
4.3.8	Leakage of the boilers category 1 .....	40
4.3.9	Temperature control and limiting devices .....	40
4.3.10	Assessment of additional risk .....	42
4.3.11	Additional safety requirements for condensing boilers .....	42
4.3.12	Additional safety requirements for outside air supply boilers and room sealed appliances .....	43
4.3.13	Heating boiler accessories .....	43
4.4	Performance requirements .....	44
4.4.1	General .....	44
4.4.2	Energy efficiency .....	44
4.4.3	Flue gas temperature .....	46
4.4.4	Draught .....	46
4.4.5	Combustion period .....	46
4.4.6	Minimum heat output .....	47
4.4.7	Emission limits .....	47
<b>5</b>	<b>Test .....</b>	<b>49</b>
5.1	Test conditions .....	49

5.1.1	General .....	49
5.1.2	Choice of boiler and fittings to be tested .....	49
5.1.3	Condition of the boiler .....	50
5.1.4	Type test .....	50
5.2	Measuring instruments and methods .....	50
5.3	Test fuel .....	51
5.4	Pressure test for boilers of sheet or sheet metal of non-ferrous metal .....	54
5.4.1	Tests to be carried out before production .....	54
5.4.2	Test during production .....	54
5.5	Pressure test for boilers of cast iron or non-ferrous metals .....	55
5.5.1	Test to be carried out before production .....	55
5.5.2	Test during production .....	55
5.6	Conducting the boiler performance test .....	56
5.6.1	General .....	56
5.6.2	Setting up the test rig .....	56
5.6.3	Measured quantities .....	57
5.6.4	Test method and test duration .....	58
5.7	Determination of the heat output and the efficiency of the boiler .....	58
5.7.1	Method for the measurement of the heat output .....	58
5.7.2	Determining the nominal heat output .....	59
5.7.3	Determining the minimum heat output .....	59
5.7.4	Verification of nominal heat output with condensation .....	60
5.7.5	Verification of the minimum continuous heat output with condensation .....	60
5.7.6	Determination of the boiler efficiency (direct method) .....	60
5.7.7	Electrical consumption .....	60
5.8	Determination of the emission values .....	61
5.8.1	Heating boiler with manual stoking .....	61
5.8.2	Heating boiler with automatic stoking .....	61
5.9	Calculation .....	61
5.9.1	Boiler heat output .....	61
5.9.2	The heat input .....	61
5.9.3	Boiler efficiency .....	61
5.9.4	Emissions .....	63
5.10	Determination of the waterside resistance .....	64
5.11	Surface temperature .....	64
5.12	Verification of condensate .....	65
5.13	Function check of the temperature controller and safety temperature limiter at the boiler .....	65
5.14	Function test for the rapidly disconnectable firing system .....	65
5.15	Function test on the device for dissipating excess heat (partly or non-disconnectable firing system) .....	66
5.16	Selected tests to demonstrate functional safety .....	66
5.16.1	General .....	66
5.16.2	Safety test of consequences of fuel overload and effect of a blockage of the fuel supply .....	67
5.16.3	Loss of combustion air supply .....	67
5.16.4	Resistance to thermal conductance .....	67
5.16.5	Additional tests for alternative verification of the safety against back burning .....	68
5.16.6	Test for gas side leakage .....	68
5.17	Check of safety for condensing operation .....	69
5.18	Additional checks of the safety for boilers with outside combustion air supply .....	69
5.18.1	Test of leakage rates .....	69
5.18.2	Temperature at combustion air connector .....	69
5.18.3	Functional safety and design limits caused by recirculation of flue gas into the combustion air supply .....	69
6	Test report and other documents .....	69
7	Marking .....	70
7.1	General .....	70
7.2	Information on the boiler plate .....	71
7.3	Boiler plate requirements .....	71
8	Technical documentation, supplied with boiler .....	71

<b>8.1</b>	<b>General .....</b>	<b>71</b>
<b>8.2</b>	<b>Technical information and installation instructions .....</b>	<b>71</b>
<b>8.3</b>	<b>Operating instructions .....</b>	<b>74</b>
<b>Annex A (informative)</b>	<b>Manual measurement of particles in the gas flow, gravimetric determination of particle load with filter systems .....</b>	<b>75</b>
<b>Annex B (normative)</b>	<b>Design criteria for solutions to prevent back burning .....</b>	<b>78</b>
<b>Annex C (informative)</b>	<b>Installation of boilers with combustion air supply from outside the building .....</b>	<b>84</b>
<b>Annex D (informative)</b>	<b>Recommended limits for substances of content of the condensate .....</b>	<b>86</b>
<b>Annex E (informative)</b>	<b>Recommended analytical methods .....</b>	<b>87</b>
<b>Annex F (informative)</b>	<b>Calculation methods .....</b>	<b>88</b>
<b>F.1</b>	<b>Calculation of seasonal space heating energy efficiency .....</b>	<b>88</b>
<b>F.2</b>	<b>Calculation of Energy Efficiency Index (EEI) .....</b>	<b>90</b>
<b>F.3</b>	<b>Seasonal space heating emissions .....</b>	<b>90</b>
<b>Annex G (normative)</b>	<b>Calculation methods for recirculation influence .....</b>	<b>92</b>
<b>Annex ZA (informative)</b>	<b>Relationship between this European Standard and the essential requirements of Directive 2006/42/EC aimed to be covered .....</b>	<b>93</b>
<b>Annex ZB (informative)</b>	<b>Relationship between this European Standard and the ecodesign requirements of Commission Regulation (EU) [2015/1189] [L 193] aimed to be covered .....</b>	<b>95</b>
<b>Annex ZC (informative)</b>	<b>Relationship between this European Standard and the energy labelling requirements of Commission Delegated Regulation (EU) [2015/1187] [L 193] aimed to be covered .....</b>	<b>96</b>
<b>Bibliography .....</b>		<b>97</b>
