

# DIN EN 12976-2:2019-11 (E)

## Thermal solar systems and components - Factory made systems - Part 2: Test methods

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		6
1	Scope .....	8
2	Normative references .....	8
3	Terms and definitions .....	8
4	Symbols and abbreviations .....	9
5	Testing .....	9
5.1	Freeze resistance .....	9
5.1.1	General .....	9
5.1.2	Systems using antifreeze fluid .....	9
5.1.3	Drain-back systems .....	10
5.1.4	Drain-down systems .....	10
5.1.5	Freeze protection and combined control functions .....	10
5.1.6	Other systems .....	11
5.2	Over temperature protection .....	11
5.2.1	Purpose .....	11
5.2.2	Apparatus .....	11
5.2.3	Procedure .....	11
5.2.4	Reporting requirements .....	12
5.3	Pressure resistance .....	12
5.3.1	Purpose .....	12
5.3.2	Apparatus .....	12
5.3.3	Safety precaution .....	13
5.3.4	Procedure .....	13
5.3.5	Reporting requirements .....	14
5.4	Water contamination .....	14
5.5	Testing the resistance against mechanical load .....	15
5.5.1	Purpose .....	15
5.5.2	Apparatus .....	15
5.5.3	Safety precaution .....	16
5.5.4	Calculation procedure for the mechanical load .....	16
5.5.5	Procedure .....	18
5.5.6	Reporting requirements .....	18
5.6	Lightning protection .....	19
5.7	Safety equipment .....	19
5.7.1	Safety valves .....	19
5.7.2	Safety lines and expansion lines .....	20
5.7.3	Blow-off lines .....	20
5.8	Labelling .....	20
5.9	Thermal performance characterization .....	21
5.9.1	Introduction .....	21
5.9.2	Test procedure .....	21
5.9.3	Prediction of yearly performance indicators .....	22
5.10	Ability of solar-plus-supplementary systems to cover the load .....	29

<b>DIN EN 12976-2:2019-11 : EN 12976-2:2019 (E) 5.10.1 General</b> .....	<b>29</b>
<b>5.10.2 Boundary conditions for auxiliary heating</b> .....	<b>30</b>
<b>5.10.3 Boundary conditions for daily load</b> .....	<b>30</b>
<b>5.10.4 Determination of the ability to cover the maximum daily load by means of testing the system</b> .....	<b>31</b>
<b>5.10.5 Determination of the ability to cover the maximum daily load by means of numerical simulations</b> .....	<b>31</b>
<b>5.10.6 Determination of the ability to cover the daily load defined by the European load profiles by means of numerical simulations</b> .....	<b>31</b>
<b>5.10.7 Requirements for mixed water at 40 °C</b> .....	<b>32</b>
<b>5.11 Reverse flow protection</b> .....	<b>33</b>
<b>5.12 Electrical safety</b> .....	<b>33</b>
<b>Annex A (normative) Thermal performance presentation sheet</b> .....	<b>34</b>
<b>Annex B (normative) Reference conditions for performance prediction</b> .....	<b>36</b>
<b>Annex C (informative) Assessment of the ability of solar DHW systems to resist the extreme climatic conditions</b> .....	<b>45</b>
<b>Annex D (informative) Ageing test for thermostatic valves</b> .....	<b>54</b>
<b>Annex E (informative) Lightning protection test for solar heating systems</b> .....	<b>57</b>
<b>Annex F (informative) Lightning Protection testing sheet</b> .....	<b>60</b>
<b>Annex G (normative) Reporting format in the framework of the EU Regulations CDR 811, 812 and 814 dated 2013</b> .....	<b>64</b>
<b>Annex ZA (informative) Relationship between this European Standard and the energy labelling requirements of Commission Delegated Regulation (EU) No 811/2013 aimed to be covered</b> .....	<b>65</b>
<b>Annex ZB (informative) Relationship between this European Standard and the energy labelling requirements of Commission Delegated Regulation (EU) No 812/2013 aimed to be covered</b> .....	<b>67</b>
<b>Annex ZC (informative) Relationship between this European Standard and the ecodesign requirements of Commission Regulation (EU) No 814/2013 aimed to be covered</b> .....	<b>70</b>
<b>Bibliography</b> .....	<b>72</b>
