DIN EN 17956:2024-10 (E)

Energy efficiency classes for technical insulation systems - Calculation method and applications

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions, symbols, units and abbreviated terms 5
3.1 Terms and definitions 5
3.2 Symbols, units and abbreviated terms 6
3.2.1 Symbols and units used in this document (according to ISO) 6
3.2.2 Abbreviated terms used in this document 7

4 Calculation method for energy efficiency classes 7
4.1 General 7
4.2 Determination of the maximum allowed density of heat flow rate 7

5 Application of energy efficiency classes 11
5.1 General 11
5.2 Selection of the energy efficiency performance of the insulation system 11
5.3 Designing phase of the operational installation 11
5.4 Dimensioning of the insulation system 11
5.4.1 General 11
5.4.2 Verification process for insulation systems 12
5.4.3 Verification process for built-in components (valves, flanges, etc.) 12

Annex A (informative) Example calculation - How to estimate the indicative space requirement for an insulation system for a selected energy efficiency class 13

A.1 Assumptions for the examples 13
A.2 Calculation 13

Annex B (informative) Example calculation - Dimensioning of a specified energy efficiency class insulation system for pipes 17

B.1 Assumptions for the examples (The same values as in Annex A) 17
B.2 Insulation system consisting of a mineral wool pipe section 18
B.3 Insulation system consisting of microporous insulation pipe sections and mineral wool blankets 18

Annex C (informative) Example calculation - Dimensioning of a specified energy efficiency class insulation system for built-in components 20

C.1 Assumptions for the examples (the same values as in Annex B) 20
C.2 Insulation system consisting of mineral wool blankets 20

Annex D (informative) Tabulated indicative space requirement for insulation per energy efficiency class 21

Annex E (informative) Tabulated maximum allowed linear density of heat flow rate per energy efficiency class 24

Annex F (informative) Ecological optimum 27
