

DIN EN 1434-3:2025-10 (E)

Thermal energy meters - Part 3: Data exchange and interfaces

Contents		Page
European foreword		4
1	Scope	6
2	Normative references	6
3	Terms, definitions and abbreviated terms	6
3.1	Terms and definitions	6
3.2	Abbreviated terms	6
4	Meter interfaces and protocols overview	7
5	Physical layer	7
5.1	General	7
5.2	Physical layer optical interface	7
5.3	Physical layer M-Bus	7
5.4	Physical layer wireless interface	7
6	Link layer	8
6.1	Link layer optical interface	8
6.1.1	Link layer optical interface with the EN 13757-2 protocol	8
6.1.2	Link layer optical interface with automatic protocol recognition	8
6.2	Link layer of M-Bus	8
6.3	Link layer wireless interface	8
7	Application layer	8
7.1	Application layer optical interface	8
7.2	Application layer M-Bus	8
7.2.1	General	8
7.2.2	Coding of data records	8
8	Application - Minimum function implementation	9
8.1	General	9
8.2	Physical layer	9
8.3	Link layer	9
8.4	Application layer	9
8.5	Control applications	9
Annex A (informative) Recommendation for thermal energy meter test interface		10
Annex B (informative) Additional information for thermal energy meters		11
Annex C (informative) Automatic protocol detection and wake-up for the optical interface		12
C.1	Introduction	12
C.2	Trying EN 13757-2 protocol	12
C.3	Trying the EN 62056-21 protocol	12
Annex D (normative) Usage of thermal energy meters in control applications		13
D.1	Thermal energy meter	13
D.2	Controller	14
Annex E (informative) Protection techniques for M-Bus meters against surge/lightning		16
Bibliography		17
