

DIN EN 12976-2:2006-04 (E)

Thermal solar systems and components - Factory made systems - Part 2: Test methods

Contents		Page
Foreword		4
Introduction		5
1	Scope	7
2	Normative references	7
3	Terms and definitions	7
4	Symbols and abbreviations	8
5	Testing	8
5.1	Freeze resistance	8
5.1.1	General	8
5.1.2	Systems using antifreeze fluid	8
5.1.3	Drain-back systems	9
5.1.4	Drain-down systems	9
5.1.5	Freeze protection and control functions combined	9
5.1.6	Other systems	9
5.2	Over temperature protection	10
5.2.1	Purpose	10
5.2.2	Apparatus	10
5.2.3	Procedure	10
5.2.4	Reporting requirements	11
5.3	Pressure resistance	11
5.3.1	Purpose	11
5.3.2	Apparatus	11
5.3.3	Safety precaution	11
5.3.4	Procedure	12
5.3.5	Reporting requirements	12
5.4	Water contamination	13
5.5	Lightning protection	13
5.6	Safety equipment	13
5.6.1	Safety valves	13
5.6.2	Safety lines and expansion lines	13
5.6.3	Blow-off lines	13
5.7	Labelling	13
5.8	Thermal performance characterisation	13
5.8.1	Introduction	13
5.8.2	Test procedure	14
5.8.3	Prediction of yearly performance indicators	14
5.9	Ability of solar-plus-supplementary systems to cover the load	19
5.9.1	General	19
5.9.2	Boundary conditions for auxiliary heating	19
5.9.3	Boundary conditions for daily load	19
5.9.4	Determination of the ability to cover the maximum daily load by means of testing the system	20
5.9.5	Determination of the ability to cover the maximum daily load by means of numerical simulations	20
5.10	Reverse flow protection	20

5.11	Electrical safety	21
	Annex A (normative) Thermal performance presentation sheet	22
	Annex B (normative) Reference conditions for performance prediction	25
B.1	General	25
B.2	Pipe diameter and insulation thickness	27
B.3	Calculation of cold water temperature at reference location	28
	Annex C (informative) Extreme climate test procedure for the assessment of the frost resistance of solar DHW systems with outdoor tank	30
C.1	Indoor test procedure for assessment of the frost resistance of solar DHW systems with outdoor tank	30
C.1.1	Objective and applicability	30
C.1.2	Apparatus and mounting of the system	30
C.1.3	Test procedure	33
C.1.4	Test conditions	35
C.1.5	Results	39
C.2	Indoor test procedure for assessment of the reliability of solar DHW systems in respect of overheating protection	39
C.2.1	Objective and applicability	39
C.2.2	Apparatus and mounting of the system	39
C.2.3	Test procedure	42
C.2.4	Test conditions	43
C.2.5	Results	44
	Annex D (informative) Ageing test for thermostatic valves	46
D.1	General	46
D.2	Test arrangement	46
D.3	Test Procedure	47
D.4	Results	47
	Annex E (informative) Lightning protection test for solar heating systems	48
E.1	Field of application	48
E.2	Purpose	48
E.3	Requirements	48
E.4	Apparatus	49
E.5	Test procedure	49
E.5.1	Test conditions	49
E.5.2	Solar heating system installation	49
E.5.3	Separation distance S_t	49
E.5.4	Size of the bonding cable or strip	49
E.5.5	Bridging between tank and supports	50
E.5.6	Bridging between collectors and supports	50
E.5.7	Bridging between collectors and tank	50
E.5.8	Connecting terminal with Lightning Protection System (LPS)	50
E.5.9	Metal sheets covering parts of the solar heating system	50
E.5.10	Heating effects due to lightning currents	50
E.5.11	Mechanical durability due to lightning mechanical loads	50
E.6	Report	50
E.7	Conclusions	50
	Annex F (informative) Lightning Protection testing sheet	51
	Bibliography	55
