

# DIN EN 13779:2007-09 (E)

## Ventilation for non-residential buildings - Performance requirements for ventilation and room-conditioning systems

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	7
4	Symbols and units .....	9
5	Agreement of design criteria .....	10
5.1	General .....	10
5.2	Principles .....	10
5.3	General building characteristics .....	10
5.4	Construction data .....	11
5.5	Geometrical description .....	11
5.6	Use of the rooms .....	11
5.7	Requirements in the rooms .....	12
5.8	System requirements .....	13
5.9	General requirements for control and monitoring .....	13
5.10	General requirements for maintenance and safety of operation .....	13
5.11	Process from project initiation to operation .....	14
6	Classification .....	14
6.1	Specification of types of air .....	14
6.2	Classification of air .....	16
6.3	System tasks and basic system types .....	21
6.4	Pressure conditions in the room .....	22
6.5	Specific fan power .....	23
6.6	Heat recovery .....	24
7	Indoor environment .....	24
7.1	General .....	24
7.2	Occupied zone .....	25
7.3	Thermal environment .....	27
7.4	Indoor air quality .....	28
7.5	Indoor air humidity .....	30
7.6	Acoustic environment .....	31
Annex A (informative) Guidelines for Good Practice .....		32
Annex B (informative) Economic aspects .....		60
Annex C (informative) Checklist for the design and use of systems with low energy consumption ...		61
Annex D (informative) Calculation and application of Specific Fan Power Calculating and checking the SFP, SFPE, and SFPV .....		64
Annex E (informative) Efficiency of ventilation and air diffusion .....		71
Bibliography .....		72
