DIN EN 15316-4-6:2007-10 (E)

Heating systems in buildings - Method for calculation of system energy requirements and system efficiencies - Part 4-6: Heat generation systems, photovoltaic systems

Contents

Page

Foreword 3

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Symbols and abbreviations 8

5 Calculation method 9
5.1 Energy delivered by the photovoltaic system 9
5.2 Solar irradiation on the photovoltaic modules 9
5.3 Peak power 10
5.4 System performance factor 10
5.5 Thermal output of the photovoltaic panel 10
5.6 Auxiliary energy consumption 10
5.7 System thermal losses 11
5.8 Recoverable system thermal losses 11

Annex A (informative) Standards linked to photovoltaic systems 12

Annex B (informative) Informative values 14

B.1 Solar irradiation on the photovoltaic modules 14
B.2 Peak power 16
B.3 System performance factor 16

Annex C (informative) Calculation examples 17

Bibliography 18
