

# DIN EN 15316-2-1:2007-10 (E)

## Heating systems in buildings - Method for calculation of system energy requirements and system efficiencies - Part 2-1: Space heating emission systems

---

Contents	Page
Foreword .....	4
Introduction .....	6
1 Scope .....	7
2 Normative references .....	7
3 Terms and definitions, symbols and units .....	7
3.1 Terms and definitions .....	7
3.2 Symbols and units .....	9
4 Relation to other EPBD-standards .....	10
5 Principle of the method .....	12
5.1 Energy calculation .....	12
5.2 Thermal energy required for heat emission .....	12
5.3 Auxiliary energy Wem,aux .....	13
5.4 Recoverable system thermal losses Qem,ls,rbl and non-recoverable system thermal losses Qem,ls,nrbl .....	13
5.5 Heat demand for space heating, building heat requirement QH .....	13
5.6 System thermal losses Qem,ls .....	14
5.7 Calculation periods .....	14
5.8 Splitting or branching of the space heating system .....	14
6 Energy calculation for a heat emission system .....	14
6.1 General .....	14
6.2 Heat loss due to non-uniform temperature distribution .....	15
6.3 Heat loss due to embedded surface heating devices .....	16
6.4 Heat loss due to control of the indoor temperature .....	16
6.5 Auxiliary energy, Wem,aux .....	17
7 Recommended calculation methods .....	17
7.1 General .....	17
7.2 Method using efficiencies .....	18
7.3 Method using equivalent increase in internal temperature .....	18
Annex A (informative) Energy losses of the heat emission system, adapted from German regulation DIN 18599 .....	20
A.1 Heat emission .....	20
A.2 Efficiencies for free heating surfaces (radiators); room heights 4 m .....	22
A.3 Efficiencies for component integrated heating surfaces (panel heaters) (room heights 4 m) .....	24
A.4 Efficiencies for electrical heating (room heights 4 m) .....	26
A.5 Efficiencies air heating (non-domestic ventilation systems) (room heights 4 m) .....	27
A.6 Efficiencies for room spaces with heights 4 m (large indoor space buildings) .....	28
A.7 Efficiencies for room spaces with heights > 10 m .....	29
Annex B (informative) Equivalent increase in internal temperature - adapted from the French regulation RT2005 .....	31

<b>B.1</b>	<b>General .....</b>	<b>31</b>
<b>B.2</b>	<b>Zones .....</b>	<b>31</b>
<b>B.3</b>	<b>Spatial variation of temperature due to stratification .....</b>	<b>31</b>
<b>B.4</b>	<b>Variation of temperature due to control .....</b>	<b>32</b>
<b>Annex C (informative) Auxiliary energy .....</b>		<b>34</b>
<b>C.1</b>	<b>General .....</b>	<b>34</b>
<b>C.2</b>	<b>Large indoor space buildings (<math>h &gt; 4</math> m) .....</b>	<b>35</b>
<b>Bibliography .....</b>		<b>38</b>
