|--------------------|---|-------------|
| Foreword .....     |   | iv          |
| Introduction ..... |   | v           |
| 1                  | Scope .....   | 1           |
| 2                  | Organization of this document .....                     | 1           |
| 3                  | Normative references .....                              | 2           |
| 4                  | Terms and definitions .....                             | 2           |
| 5                  | Overview of interface suites .....                      | 3           |
| 6                  | General support interface suites .....                  | 4           |
| 6.1                | Instantiation of realization elements .....             | 4           |
| 6.2                | Interaction with and between realization elements ..... | 51          |
| 7                  | Overview of realization .....                           | 108         |
| 7.1                | General .....   | 108         |
| 7.2                | Guiding principles .....                                | 108         |
| 7.3                | Assumptions .....                                       | 109         |
| 7.4                | Architecture overview .....                             | 110         |
| 7.5                | M3W stakeholders .....                                  | 111         |
| 7.6                | Technical context .....                                 | 116         |
| 8                  | Development framework .....                             | 118         |
| 8.1                | Overview .....  | 118         |
| 8.2                | Concepts .....  | 118         |
| 8.3                | Behaviour .....   | 127         |
| 9                  | Iterator idiom .....                                    | 129         |
| 9.1                | Overview .....  | 129         |
| 10                 | Execution framework .....                               | 130         |
| 10.1               | Concepts .....  | 130         |
| 10.2               | Behaviour .....   | 149         |
| 11                 | Service Manager .....                                   | 154         |
| 11.1               | Description .....                                       | 154         |
| 11.2               | Service Manager's APIs .....                            | 154         |
| 11.3               | Logical component and service .....                     | 155         |
| 11.4               | Hierarchical structure of service .....                 | 156         |
| 11.5               | Service Manager usages .....                            | 157         |
| 11.6               | Metadata .....  | 162         |
| 12                 | Remote Method Invoker .....                             | 191         |
| 12.1               | Overview .....  | 191         |
| 12.2               | Proxies and wrappers .....                              | 193         |
| 12.3               | Marshalling parameters .....                            | 196         |
| 12.4               | REMI-R logical component .....                          | 199         |
| 12.5               | REMI-P logical component .....                          | 200         |

|             |   |            |
