

ISO/IEC 8825-6:2008-04 (E)

Information technology_ - ASN.1 encoding rules: Registration and application of PER encoding instructions

CONTENTS

	<i>Page</i>
1 Scope	1
2 Normative references	1
2.1 Identical Recommendations International Standards	1
3 Definitions	1
4 Abbreviations	2
5 Notation	2
6 Information to be provided to specify a PER encoding instruction	2
7 Status of a PER EI proposal during the approval process	3
8 Approval process	3
9 Publication by the Registration Authority	4
10 Restrictions on the use of PER Encoding Instructions	4
11 Assigning a PER EI to an ASN.1 type using a type prefix	5
12 Assigning a PER encoding instruction using an encoding control section	5
12.1 The encoding instruction assignment list	5
12.2 Identification of the targets for a PER encoding instruction using a target list	5
13 Multiple assignment of PER encoding instructions	9
13.1 Order in which multiple assignments are considered	9
13.2 Effect of assigning a negating encoding instruction	10
13.3 Multiple assignment of PER encoding instructions	10
Annex A – Example of the the application of PER EIs using prefixed encoding instructions	11
Annex B – Example of the the application of PER EIs using targetted encoding instructions	14
Annex C – Summary of the ASN.1 notation	16
