

ISO/IEC 14496-27:2009-12 (E)

Information technology - Coding of audio-visual objects - Part 27: 3D Graphics conformance

Contents		Page
Foreword		iv
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms definitions, abbreviations and symbols	2
4	Tools from ISO/IEC 14496-11, Scene description and application engine, and ISO/IEC 14496-16, Animation Framework eXtension (AFX)	2
4.1	Scene graph nodes	2
4.1.1	Bitstream conformance	2
4.1.2	Terminal conformance	2
4.1.3	Rendering conformance	8
4.2	Elementary bitstreams	8
4.2.1	Common conformance point	8
4.2.2	Geometry bitstreams	9
4.2.3	Appearance bitstreams	20
4.2.4	Animation bitstreams	25
4.2.5	AFX generic backchannel	52
4.2.6	Scene partitioning	53
4.2.7	MPEG-4 3D graphics stream	54
4.3	Profiles	54
4.3.1	Conformance for X3D interactive graphics profiles and levels	54
4.3.2	Conformance for MPEG-4 X3D interactive scene graph profile and levels	56
4.3.3	Conformance for core 3D compression profile	56
4.3.4	Conformance for 3D multiresolution compression profile	57
5	Tools from ISO/IEC 14496-21, MPEG-J Graphics Framework eXtension (GFX)	58
5.1	MPEG-J conformance points	58
5.2	Bitstream conformance	59
5.2.1	MPEG-J conformance	59
5.3	Terminal conformance	60
5.3.1	MPEG-J conformance	61
6	Tools from ISO/IEC 14496-25, 3D Graphics Compression Model	63
6.1	Conformance points	63
6.1.1	Covered functionalities	63
6.2	Bitstream conformance	63
6.2.1	Conformance requirements	63
6.2.2	Measurement procedure	63
6.2.3	Tolerance	63
6.3	Terminal conformance	64
6.3.1	Conformance requirements	64
6.3.2	Test bitstreams	64
6.3.3	Measurement procedure	64
6.3.4	Tolerance	64
