

ISO/IEC 18014-3:2009-12 (E)

Information technology - Security techniques - Time-stamping services - Part 3: Mechanisms producing linked tokens

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General discussion	3
5	Operations specific to TSAs producing linked tokens	3
5.1	Linking operation	3
5.2	Aggregation operation	4
5.3	Publishing operation	5
5.4	Extend operation	5
6	Message formats	5
6.1	Time-stamp request	5
6.2	Time-stamp response	6
6.3	Verify request	6
6.4	Verify response	7
6.5	Extend request	7
6.6	Extend response	7
7	Data types	8
7.1	Object identifiers	8
7.2	TSTInfo	8
7.3	TimeStampToken	9
7.4	BindingInfo	10
7.5	Chain	11
7.6	Link	11
7.7	Node	12
7.8	PublicationInfo	12
7.9	Extensions	13
8	Generating a time-stamp token	15
8.1	General	15
8.2	DigestedData encapsulation	16
8.3	SignedData encapsulation	16
8.4	Security considerations	17
9	Verifying a time-stamp token	17
9.1	General	17
9.2	DigestedData encapsulation	18
9.3	SignedData encapsulation	18
9.4	Security considerations	18
10	Extending a time-stamp token	18

11	Renewing a time-stamp token	19
11.1	General	19
11.2	Renewal and verify operation	19
11.3	Renewal and extend operation	19
	Annex A (normative) ASN.1 Module for time-stamping	21
	Annex B (informative) Additional discussion	29
	Annex C (informative) Data structures	33
	Bibliography	37
