Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Terms and definitions 2
3.1 External definitions 2
3.2 Other definitions 2

4 Abbreviations 3

5 Background 5

6 Technical aspects of emergency calls in enterprise networks 8
6.1 Identifying a call as an emergency call 8
6.1.1 User actions 8
6.1.2 Signalling impact 10
6.1.3 Unauthenticated access 12
6.2 Obtaining and delivering the location of the caller 12
6.2.1 Format of location information 13
6.2.2 Obtaining location information for delivery 13
6.2.3 Location conveyance in SIP 18
6.3 Routing an emergency call to the appropriate SAP 18
6.3.1 Routing by the calling device 19
6.3.2 Routing by enterprise SIP intermediary 20
6.4 Delivering information to the SAP to allow a return call or verification call to be made 21
6.4.1 Delivery of caller identification 21
6.4.2 Delivery of device identification 21
6.4.3 Identifying a return call or verification call 22
6.5 Ensuring appropriate resources are available for an emergency call, return call or verification call 22
6.6 Ensuring appropriate media quality during an emergency call 23
6.7 Security considerations 24
6.8 Other aspects 25
6.8.1 Hosted users 25
6.8.2 Guest users 25

7 NGN considerations 25

8 Device considerations 27

9 Alternatives for roaming mobile and nomadic users 28
9.1 Establishing an emergency call when already signalling via a visited public network 28
9.2 Establishing an emergency call via a visited public network when other traffic is signalled directly via the enterprise network 29
9.3 Establishing an emergency call directly to a PSAP 29

10 Enterprise responsibilities 29

11 Summary of requirements and standardisation gaps 30
11.1 Requirements on NGNs 30
11.2 Recommendations on enterprise networks 30
11.3 Standardisation gaps 31

Bibliography 32
