

# ISO/IEC TR 29181-3:2013-04 (E)

## Information technology - Future Network - Problem statement and requirements - Part 3: Switching and routing

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Abbreviations .....	3
5	Background .....	4
5.1	Main features .....	4
5.2	Rationale for a new paradigm .....	4
5.2.1	Appropriateness for today's traffic .....	4
5.2.2	Addressing and scalability .....	5
5.2.3	Security .....	5
5.2.4	Complexity of routing hardware .....	5
5.3	Migration .....	6
5.4	Structure of this document .....	6
6	Requirements .....	6
6.1	Introduction .....	6
6.2	Classes of flow .....	7
6.2.1	Minimising complexity .....	7
6.2.2	Synchronous flows .....	7
6.2.3	Asynchronous flows .....	9
6.3	Addressing .....	11
6.4	Security and accountability .....	11
6.4.1	Privacy, trust and traceability .....	11
6.4.2	Corruption of data units .....	11
6.4.3	Resilience .....	12
6.4.4	Accounting .....	12
6.4.5	Time-limited calls .....	12
6.4.6	Prioritisation of calls .....	13
6.5	Net neutrality .....	13
6.6	Mobility .....	13
6.7	Scalability .....	13
6.8	Network management .....	13
6.9	Energy efficiency .....	14
7	Gap analysis .....	14
7.1	Introduction .....	14
7.2	Service experienced by flows .....	14
7.2.1	Delay and throughput .....	14
7.2.2	Packet size .....	15
7.3	Addressing .....	15
7.4	Security and accountability .....	16
7.4.1	Privacy, trust and traceability .....	16
7.4.2	Resilience .....	16

7.4.3	Accounting .....	16
7.4.4	Time-limited calls .....	16
7.4.5	Prioritisation of calls .....	16
7.5	Net neutrality .....	16
7.6	Mobility .....	16
7.7	Scalability .....	17
7.8	Network management .....	17
7.9	Energy efficiency .....	17
8	Functional architecture for switching and routing .....	17
8.1	Model of the switching and routing process .....	17
8.2	Structure of the network .....	18
8.3	Layers .....	19
9	Requirements for data plane .....	19
9.1	General .....	19
9.2	Asynchronous service .....	20
10	Requirements for control plane .....	21
10.1	Control plane protocol .....	21
10.2	Message format .....	21
10.2.1	Encoding .....	21
10.2.2	Size .....	22
10.2.3	Extensibility .....	22
10.3	Relationship with link partner .....	22
10.4	Timeouts .....	22
10.5	Acknowledgements .....	22
10.6	Call set-up .....	23
10.6.1	Calls .....	23
10.6.2	Routes .....	23
10.6.3	Identification .....	23
10.6.4	Information in set-up messages .....	23
10.6.5	Synchronous flows .....	24
10.6.6	Asynchronous flows .....	24
10.7	Routing .....	24
10.8	Other messages .....	25
10.8.1	Disconnecting calls, flows, and routes .....	25
10.8.2	Rerouting .....	25
10.8.3	Changing QoS parameters .....	25
10.8.4	Adding flows .....	25
10.8.5	User data .....	25
11	Route finding .....	26
11.1	General requirements .....	26
11.2	Propagation of routing information .....	26
11.3	Message format .....	26
Annex A (informative)	Use cases and other background information .....	27
A.1	Remote contribution to radio broadcasts .....	27
Bibliography	.....	29
