

ISO/IEC 15444-14:2013-07 (E)

Information technology - JPEG 2000 image coding system - Part 14: XML representation and reference

Contents		Page
1	Scope	1
2	Normative references	1
2.1	Identical Recommendation International Standards	1
2.2	Paired Recommendations International Standards equivalent in technical content.....	1
2.3	Additional references	2
3	Definitions.....	2
4	Abbreviations and symbols	3
4.1	Abbreviations	3
5	Conventions.....	3
6	General description.....	4
6.1	Structure of the JPXML document.....	4
6.2	Creation of a JPXML document.....	5
6.3	Access with the JPXML document	6
7	Document creation rules.....	7
7.1	Common rule.....	7
7.2	Element name rule for box format	8
7.3	Element name rule for a tagged image format	8
7.4	Element name rule for a marker segment.....	9
7.5	Element type attributes.....	9
8	Accessing image data	10
8.1	Rules for location conversion.....	10
8.2	Example of location conversion	11
Annex A	– JPXML elements for box file format.....	13
A.1	Introduction.....	13
A.2	Box element definitions	13
A.3	Examples of XML schemas	33
Annex B	– JPXML elements for codestream marker segments.....	61
B.1	Introduction	61
B.2	JPEG 2000 codestream marker element definitions.....	61
B.3	Examples of XML schemas	68
Annex C	– Examples and guidelines	83
C.1	Software conventions for the box type.....	83
C.2	Example of JPXML document conversion.....	84
