ISO/IEC TR 29181-4:2013-10 (E)

Information technology - Future Network - Problem statement and requirements - Part 4: Mobility

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Abbreviations 2

5 General 3
5.1 Mobile environment in FN 3
5.2 Related works on mobility in FN 4

6 Problem statement of current network in mobile environment 5
6.1 Overloaded semantics of IP address 5
6.2 Single common protocol for heterogeneous networks 5
6.3 Integration of data delivery and control function 5
6.4 Centralized mobility control 5

7 Architectural requirements for mobility support in FN 6
7.1 Separation of identifier and locator 6
7.2 Support of heterogeneous access networks 6
7.3 Separation of mobility control function from user data delivery 6
7.4 Support of distributed mobility control 6

8 Functional requirements for mobility support in FN 6
8.1 Location management 6
8.2 Route optimization 7
8.3 Handover control 7

Annex A (informative) Existing IP-based mobility control protocols 8

Annex B (informative) High-level architecture of mobility control in FN 14

Annex C (informative) Distributed mobility control in Proxy MIPv6 networks 18

Annex D (informative) Additional considerations for FN mobility 20

Bibliography 21
