

ISO/IEC TR 29181-4:2013-10 (E)

Information technology - Future Network - Problem statement and requirements - Part 4: Mobility

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviations	2
5 General	3
5.1 Mobile environment in FN	3
5.2 Related works on mobility in FN	4
6 Problem statement of current network in mobile environment	5
6.1 Overloaded semantics of IP address	5
6.2 Single common protocol for heterogeneous networks	5
6.3 Integration of data delivery and control function	5
6.4 Centralized mobility control	5
7 Architectural requirements for mobility support in FN	6
7.1 Separation of identifier and locator	6
7.2 Support of heterogeneous access networks	6
7.3 Separation of mobility control function from user data delivery	6
7.4 Support of distributed mobility control	6
8 Functional requirements for mobility support in FN	6
8.1 Location management	6
8.2 Route optimization	7
8.3 Handover control	7
Annex A (informative) Existing IP-based mobility control protocols	8
Annex B (informative) High-level architecture of mobility control in FN	14
Annex C (informative) Distributed mobility control in Proxy MIPv6 networks	18
Annex D (informative) Additional considerations for FN mobility	20
Bibliography	21
