

ISO/IEC TR 29181-4:2013-10 (E)

Information technology - Future Network - Problem statement and requirements - Part 4: Mobility

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviations	2
5	General	3
5.1	Mobile environment in FN	3
5.2	Related works on mobility in FN	4
6	Problem statement of current network in mobile environment	5
6.1	Overloaded semantics of IP address	5
6.2	Single common protocol for heterogeneous networks	5
6.3	Integration of data delivery and control function	5
6.4	Centralized mobility control	5
7	Architectural requirements for mobility support in FN	6
7.1	Separation of identifier and locator	6
7.2	Support of heterogeneous access networks	6
7.3	Separation of mobility control function from user data delivery	6
7.4	Support of distributed mobility control	6
8	Functional requirements for mobility support in FN	6
8.1	Location management	6
8.2	Route optimization	7
8.3	Handover control	7
Annex A (informative) Existing IP-based mobility control protocols		8
Annex B (informative) High-level architecture of mobility control in FN		14
Annex C (informative) Distributed mobility control in Proxy MIPv6 networks		18
Annex D (informative) Additional considerations for FN mobility		20
Bibliography		21
