

# ISO/IEC TR 29181-4:2013-10 (E)

## Information technology - Future Network - Problem statement and requirements - Part 4: Mobility

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Abbreviations .....	2
5	General .....	3
5.1	Mobile environment in FN .....	3
5.2	Related works on mobility in FN .....	4
6	Problem statement of current network in mobile environment .....	5
6.1	Overloaded semantics of IP address .....	5
6.2	Single common protocol for heterogeneous networks .....	5
6.3	Integration of data delivery and control function .....	5
6.4	Centralized mobility control .....	5
7	Architectural requirements for mobility support in FN .....	6
7.1	Separation of identifier and locator .....	6
7.2	Support of heterogeneous access networks .....	6
7.3	Separation of mobility control function from user data delivery .....	6
7.4	Support of distributed mobility control .....	6
8	Functional requirements for mobility support in FN .....	6
8.1	Location management .....	6
8.2	Route optimization .....	7
8.3	Handover control .....	7
Annex A (informative) Existing IP-based mobility control protocols .....		8
Annex B (informative) High-level architecture of mobility control in FN .....		14
Annex C (informative) Distributed mobility control in Proxy MIPv6 networks .....		18
Annex D (informative) Additional considerations for FN mobility .....		20
Bibliography .....		21
