

ISO 15397:2014-02 (E)

Graphic technology - Communication of graphic paper properties

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	List of required criteria for communication of paper properties	5
5	ISO standards related to required criteria	6
5.1	Sampling and general information useful for technical communication	6
5.2	Brand name and paper mill	6
5.3	Grammage	7
5.4	Bulk and/or thickness	7
5.5	Roughness for evaluation of surface properties	7
5.6	Gloss	7
5.7	Opacity	8
5.8	Brightness and whiteness of unprinted paper	8
5.9	Colour measurement of paper white point in printing conditions (D50/2°)	9
5.10	Colour measurement of unprinted paper in outdoor conditions (D65/10°)	10
5.11	Supported colour gamut in the context of prepress design	10
5.12	Fluorescence in the context of prepress	10
5.13	Storage conditions, influence of aging and testing conditions for proofing substrates	11
5.14	Bending resistance (bending stiffness) for Sheet-Fed Offset printing substrates	11
