ISO/IEC 9594-3:2014-03 (E)

Information technology - Open Systems Interconnection - The Directory - Part 3: Abstract service definition

Contents

			Page
1	Scope		1
2	Normative references		1
	2.1	Identical Recommendations | International Standards	1
	2.2	Other references	2
3	Definitions		2
	3.1	Basic Directory definitions	2
	3.2	Directory model definitions	2
	3.3	Directory information base definitions	2
	3.4	Directory entry definitions	2
	3.5	Name definitions	3
	3.6	Distributed operations definitions	3
	3.7	Abstract service definitions	3
4	Abbreviations		4
5	Conventions		4
6	Overview of the Directory service		4
7	Information types and common procedures		5
	7.1	Introduction	5
	7.2	Information types defined elsewhere	5
	7.3	Common arguments	6
	7.4	Common results	9
	7.5	Service controls	9
	7.6	Entry information selection	12
	7.7	Entry information	15
	7.8	Filter	17
	7.9	Paged results	20
	7.10	Security parameters	21
	7.11	Common elements of procedure for access control	23
	7.12	Managing the DSA Information Tree	24
	7.13	Procedures for families of entries	25
8	Bind, Unbind operations, Change Password and Administer Password operations		26
	8.1	Directory Bind	26
	8.2	Directory Unbind	29
9	Directory Read operations		29
	9.1	Read	29
	9.2	Compare	32
	9.3	Abandon	35
10	Directory Search operations		35
	10.1	List	35
	10.2	Search	39

11 Directory Modify operations 50
11.1 Add Entry 50
11.2 Remove Entry 52
11.3 Modify Entry 54
11.4 Modify DN 58
11.5 Change Password 60
11.6 Administer Password 61
12 Operations for LDAP messages 62
12.1 LDAP Transport operation 62
12.2 Linked LDAP operation 64
13 Errors 65
13.1 Error precedence 65
13.2 Abandoned 65
13.3 Abandon Failed 66
13.4 Attribute Error 66
13.5 Name Error 67
13.6 Referral 68
13.7 Security Error 68
13.8 Service Error 69
13.9 Update Error 71
14 Analysis of search arguments 72
14.1 General check of search filter 73
14.2 Check of request-attribute-profiles 74
14.3 Check of controls and hierarchy selections 76
14.4 Check of matching use 76
Annex A – Abstract Service in ASN.1 78
Annex B – Operational semantics for Basic Access Control 94
Annex C – Examples of searching families of entries 107
C.1 Single family example 107
C.2 Multiple families example 108
Annex D – External ASN.1 module 111
Annex E – Amendments and corrigenda 115
