ISO/IEC 26550:2015-12 (E)

Software and systems engineering - Reference model for product line engineering and management

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 From single-system engineering and management toward product line engineering and management 6
4.1 Challenges product companies face in the use of single-system engineering and management 6
4.2 Variability management 7
4.3 Key differentiators between single-system engineering and management and product line engineering and management 7

5 Reference model for product line engineering and management 9
5.1 General 9
5.2 Product line reference model 10

6 Two life cycles and two process groups for product line engineering and management 12
6.1 Domain engineering life cycle 12
6.1.1 Product line scoping 12
6.1.2 Domain requirements engineering 12
6.1.3 Domain design 13
6.1.4 Domain realization 14
6.1.5 Domain verification and validation 15
6.2 Application engineering life cycle 16
6.2.1 Application requirements engineering 16
6.2.2 Application design 16
6.2.3 Application realization 17
6.2.4 Application verification and validation 18
6.3 Organizational management process group 19
6.3.1 Organizational-level product line planning 19
6.3.2 Organizational product line-enabling management 21
6.3.3 Organizational product line management 21
6.4 Technical management process group 22
6.4.1 Process management 22
6.4.2 Variability management 23
6.4.3 Asset management 24
6.4.4 Support management 25

7 Relationships within and between domain engineering and application engineering 25
7.1 Interrelations between product line scoping and domain requirements engineering 25
7.2 Interrelations between domain requirements engineering and domain design 26
7.3 Interrelations between domain design and domain realization 26
7.4 Interrelations between domain requirements engineering and domain verification and validation 27
7.5 Interrelations between domain design and domain verification and validation 27

7.6 Interrelations between domain realization and domain verification and validation 28
7.7 Interrelations between product line scoping and application requirements engineering 28 7.8 Interrelations between domain requirements engineering and application requirements engineering 29
7.9 Interrelations between domain design and application design 29
7.10 Interrelations between domain realization and application realization 30
7.11 Interrelations between domain verification and validation and application verification and validation 30
7.12 Interrelations between application requirements engineering and application design 31

7.13 Interrelations between application design and application realization 31
7.14 Interrelations between application requirements engineering and application verification and validation 32
7.15 Interrelations between application design and application verification and validation 32
7.16 Interrelations between application realization and application verification and validation 33

Annex A (informative) Further information on products 34
