

ISO/IEC 30130:2016-02 (E)

Software engineering - Capabilities of software testing tools

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Object model for software testing tools	2
4.1	Overview of the object model	2
4.2	Test target	3
4.3	Dynamic test execution entity	3
4.4	Code analysis entity	4
4.5	Test management entity	4
5	Category of test entity	5
5.1	Overview	5
5.2	Categories of dynamic test execution entities	5
5.2.1	Input for dynamic test execution	5
5.2.2	Dynamic test execution	5
5.2.3	Test data repository	5
5.2.4	Test environment	6
5.3	Categories of code analysis entities	6
5.3.1	Input for code analysis	6
5.3.2	Code analysis	6
5.4	Categories of test management entities	6
5.4.1	Test plan	6
5.4.2	Test asset	6
5.4.3	Quality record report	6
5.4.4	Test completion report	6
5.4.5	Verification and validation report	6
5.4.6	Test status report	6
6	Characteristics of software testing tools	6
6.1	Overview	6
6.2	Quality characteristics	7
6.3	Granularity	8
6.4	Other aspects of characteristics	9
7	Capabilities of software testing tools	9
7.1	Overview	9
7.2	Dynamic test execution	9
7.2.1	Input for dynamic test execution	9
7.2.2	Dynamic Test Execution	10
7.2.3	Test data repository	11
7.2.4	Test Environment	12
7.3	Code analysis	13
7.3.1	Input for code analysis	13
7.3.2	Code analysis	13
7.4	Test management	14

7.4.1	Test plan	14
7.4.2	Test asset	14
7.4.3	Quality record report	14
7.4.4	Test completion report	15
7.4.5	Verification and validation report	15
7.4.6	Test status report	15
7.5	Summary of capabilities with characteristics	16
Annex A (informative) Capabilities mapping to test process		19
Annex B (informative) Overview of the approach for this International Standard		25
Bibliography		27
