

ISO/IEC 19637:2016-12 (E)

Information technology - Sensor network testing framework

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	2
5	Overview of a sensor network testing framework (SNTF)	2
5.1	Testing requirements of sensor networks	2
5.2	Conceptual model of SNTF	3
5.3	Description of test manager (TMR)	4
5.4	Description of test agent (TA)	5
6	Testing services	5
6.1	General	5
6.2	Module interactions through unified services	7
6.3	Test data services (TDSs)	8
6.3.1	General	8
6.3.2	EventReport service	9
6.3.3	EventAck service	10
6.3.4	Read service	11
6.3.5	Write service	13
6.3.6	StartTest service	15
6.3.7	StopTest service	17
6.3.8	StartDownAndUploading service	18
6.3.9	StopDownAndUploading service	20
6.3.10	DataUploading service	21
6.3.11	DataDownloading service	23
6.3.12	ExecuteTesting service	25
6.4	Testing management services	27
6.4.1	Overview	27
6.4.2	Associate service	27
6.4.3	Abort service	29
6.4.4	AddressAllocation service	30
6.4.5	Sync Service	32
6.4.6	DeviceStatus service	32
Annex A (informative) Example of the testing platform for hybrid sensor networks based on IPv6 ...		34
