

# ISO/IEC TR 23002-6:2017-10 (E)

## Information technology - MPEG video technologies - Part 6: Tools for reconfigurable media coding implementations

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms, definitions and abbreviated terms .....	1
4	Overview .....	3
5	RVC-CAL .....	3
5.1	General .....	3
5.2	Installing ORCC tools .....	3
5.2.1	Java Runtime Environment .....	3
5.2.2	Eclipse .....	4
5.2.3	ORCC plug-in for Eclipse .....	4
5.3	"Hello world" .....	5
5.3.1	Creating a new project .....	5
5.3.2	Creating a new package .....	7
5.3.3	Creating a new actor .....	7
5.3.4	Creating a network .....	8
5.3.5	Running simulation .....	12
5.4	Simple actor .....	15
5.4.1	Structure of actors .....	15
5.4.2	Simplest actor .....	15
5.4.3	Running the examples .....	16
5.4.4	Other simple actors .....	17
5.4.5	Network of simple actors .....	19
5.5	Non-determinism .....	20
5.6	Guarded actions .....	20
5.7	State variables .....	23
5.8	Scheduling .....	25
5.9	Priorities .....	28
5.10	Repeat clause .....	29
5.11	Control flow .....	31
5.11.1	General .....	31
5.11.2	Data types .....	31
5.11.3	Assignments .....	31
5.11.4	If statement .....	32
5.11.5	While statement .....	33
5.11.6	Foreach statement .....	33
6	Papify and Papify Viewer .....	34
6.1	General .....	34
6.2	Using Papify .....	34
6.2.1	Papify activation .....	35
6.2.2	Actor assessment .....	36
6.2.3	Action assessment .....	37
6.2.4	Output folder .....	37

6.3	Papify Viewer .....	37
6.3.1	Chronological visualization .....	37
6.3.2	Event histograms .....	40
7	TURNUS .....	41
7.1	General .....	41
7.2	Installing the TURNUS framework .....	42
7.2.1	General .....	42
7.2.2	Java Runtime Environment .....	42
7.2.3	Eclipse .....	42
7.2.4	TURNUS plug-in for Eclipse .....	42
7.3	Profiling an RVC-CAL HEVC video decoder .....	43
7.3.1	General .....	43
7.3.2	Download the design and the conformance bit-streams .....	43
7.3.3	Import the HEVC design project in the Eclipse IDE workspace .....	44
7.3.4	Static code profiling .....	45
7.3.5	Dynamic code programming .....	49
7.3.6	TURNUS ORCC dynamic interpreter profiler .....	50
7.3.7	Algorithmic bottleneck analysis .....	61
7.3.8	Impact analysis .....	62
7.3.9	Buffer size minimization .....	63
7.3.10	Partitioning .....	64
	Bibliography .....	66
