## Identification cards - Integrated circuit cards - Part 9: Commands for card management

---

| <b>Contents</b>       |  | <b>Page</b> |
|-----------------------|--|-------------|
| Foreword .....        |  | iv          |
| Introduction .....    |  | v           |
| 1                     | Scope .....  | 1           |
| 2                     | Normative references .....                           | 1           |
| 3                     | Terms and definitions .....                          | 1           |
| 4                     | Symbols and abbreviated terms .....                  | 2           |
| 5                     | Life cycle .....                                     | 3           |
| 5.1                   | General properties .....                             | 3           |
| 5.2                   | Generic life cycle status .....                      | 4           |
| 5.3                   | Command-dependent life cycle status transition ..... | 6           |
| 5.4                   | Life cycle status inheritance and evaluation .....   | 7           |
| 5.4.1                 | General .....  | 7           |
| 5.4.2                 | General rules for life cycle status evaluation ..... | 7           |
| 5.4.3                 | Behaviour for effective LCS .....                    | 8           |
| 6                     | Commands for card management .....                   | 8           |
| 6.1                   | General .....  | 8           |
| 6.2                   | create file command .....                            | 9           |
| 6.3                   | delete command .....                                 | 10          |
| 6.4                   | deactivate command .....                             | 10          |
| 6.5                   | activate command .....                               | 11          |
| 6.6                   | terminate command .....                              | 11          |
| 6.7                   | terminate ef command .....                           | 12          |
| 6.8                   | manage data command .....                            | 12          |
| 6.9                   | create command .....                                 | 13          |
| 6.10                  | terminate card usage command .....                   | 14          |
| 6.11                  | import card secret command .....                     | 14          |
| Annex A (informative) | Command-dependent LCS transition examples .....      | 16          |
| Annex B (informative) | Life cycle status handling examples .....            | 18          |
| Bibliography .....    |  | 21          |
