ISO/IEC 30140-1:2018-02 (E)

Information technology - Underwater acoustic sensor network (UWASN) - Part 1: Overview and requirements

Contents

Page

FOREWORD 5
INTRODUCTION 6
1 Scope 7
2 Normative references 7
3 Terms and definitions 7
4 Abbreviated terms 9
5 UWASN overview and applications 9
5.1 Overview 9
5.2 Application domain of UWASN 11
6 Characteristics of UWASN in terms of the effects of propagation variability 12
6.1 Underwater acoustic communication 12
6.2 Acoustic signal strength attenuation 12
6.3 High propagation delay 12
6.4 Multipath 13
6.5 Propagation loss 13
6.6 Noise 14
7 Differences between UWASN and terrestrial sensor network 14
7.1 Types of underwater communication technologies 14
7.2 Housing case 16
7.3 Costs associated with sensor nodes 16
7.4 Omni-directional and directional transducers for data transmission and reception 16
7.5 Underwater object and event localization and 3D relay node 17
7.6 Energy harvesting technology for UWASN 18
8 Specificities of UWASN and related requirements 18
8.1 Three structural scales of UWASN network 18
8.2 Deployments of 2D and 3D topology 21
8.2.1 General 21
8.2.2 Two-dimensional UWASN architecture 21
8.2.3 Three-dimensional UWASN architecture 22
8.3 Cross layering 24
8.4 Underwater acoustic modem 25
8.5 Doppler spread 25
8.6 Deployment considering water depths 26
8.7 Underwater wired and wireless communication 26
8.8 Time synchronization 27
8.9 Data transmission period for energy saving 28
8.10 Routing 29
8.11 Network coding 31
8.12 Data compression 31
8.13 Delay and disruption tolerant network (DTN) 31

9 UWASN further general requirements 32
9.1 General 32
9.2 General requirements for UWASN – Cross layering 32
9.3 General requirements for the UWASN – Communication technology 32
9.4 General requirements for the UWASN – Other system requirements 33
Annex A (informative) Selected applications of UWASN 34
A.1 Environmental monitoring – Chemical and biological changes 34
A.1.1 Description 34
A.1.2 Physical entities 35
A.1.3 Normal flow 35
A.1.4 Conditions 35
A.2 Detection of pipeline leakages 35
A.2.1 Description 35
A.2.2 Physical entities 36
A.2.3 Normal flow 36
A.2.4 Conditions 37
A.3 Exploration of natural resources 37
A.3.1 Description 37
A.3.2 Physical entities 38
A.3.3 Normal flow 38
A.3.4 Conditions 39
A.4 Fish farming 39
A.4.1 Description 39
A.4.2 Physical entities 40
A.4.3 Normal flow 40
A.4.4 Conditions 40
A.5 Harbour security 40
A.5.1 Description 40
A.5.2 Physical entities 41
A.5.3 Normal flow 41
A.5.4 Conditions 42
