

ISO/IEC 30140-1:2018-02 (E)

Information technology - Underwater acoustic sensor network (UWASN) - Part 1: Overview and requirements

Contents	Page
FOREWORD.....	5
INTRODUCTION.....	6
1 Scope.....	7
2 Normative references.....	7
3 Terms and definitions.....	7
4 Abbreviated terms.....	9
5 UWASN overview and applications.....	9
5.1 Overview.....	9
5.2 Application domain of UWASN.....	11
6 Characteristics of UWASN in terms of the effects of propagation variability.....	12
6.1 Underwater acoustic communication.....	12
6.2 Acoustic signal strength attenuation.....	12
6.3 High propagation delay.....	12
6.4 Multipath.....	13
6.5 Propagation loss.....	13
6.6 Noise.....	14
7 Differences between UWASN and terrestrial sensor network.....	14
7.1 Types of underwater communication technologies.....	14
7.2 Housing case.....	16
7.3 Costs associated with sensor nodes.....	16
7.4 Omni-directional and directional transducers for data transmission and reception.....	16
7.5 Underwater object and event localization and 3D relay node.....	17
7.6 Energy harvesting technology for UWASN.....	18
8 Specificities of UWASN and related requirements.....	18
8.1 Three structural scales of UWASN network.....	18
8.2 Deployments of 2D and 3D topology.....	21
8.2.1 General.....	21
8.2.2 Two-dimensional UWASN architecture.....	21
8.2.3 Three-dimensional UWASN architecture.....	22
8.3 Cross layering.....	24
8.4 Underwater acoustic modem.....	25
8.5 Doppler spread.....	25
8.6 Deployment considering water depths.....	26
8.7 Underwater wired and wireless communication.....	26
8.8 Time synchronization.....	27
8.9 Data transmission period for energy saving.....	28
8.10 Routing.....	29
8.11 Network coding.....	31
8.12 Data compression.....	31
8.13 Delay and disruption tolerant network (DTN).....	31

9	UWASN further general requirements	32
9.1	General.....	32
9.2	General requirements for UWASN – Cross layering	32
9.3	General requirements for the UWASN – Communication technology	32
9.4	General requirements for the UWASN – Other system requirements	33
Annex A	(informative) Selected applications of UWASN.....	34
A.1	Environmental monitoring – Chemical and biological changes.....	34
A.1.1	Description	34
A.1.2	Physical entities	35
A.1.3	Normal flow	35
A.1.4	Conditions	35
A.2	Detection of pipeline leakages	35
A.2.1	Description	35
A.2.2	Physical entities	36
A.2.3	Normal flow	36
A.2.4	Conditions	37
A.3	Exploration of natural resources.....	37
A.3.1	Description	37
A.3.2	Physical entities	38
A.3.3	Normal flow	38
A.3.4	Conditions	39
A.4	Fish farming.....	39
A.4.1	Description	39
A.4.2	Physical entities	40
A.4.3	Normal flow	40
A.4.4	Conditions	40
A.5	Harbour security	40
A.5.1	Description	40
A.5.2	Physical entities	41
A.5.3	Normal flow	41
A.5.4	Conditions	42
