ISO/IEC 29110-4-1:2018 (E)

Systems and software engineering — Lifecycle profiles for Very Small Entities (VSEs) — Part 4-1: Software engineering - Profile specifications: Generic profile group

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms, definitions and abbreviated terms

3.1 Terms and definitions
3.2 Abbreviated terms

4 Conformance

4.1 Conformance situations
4.2 Conformance to this document

5 Naming, diagramming and definition conventions

6 Profile specification and its conformance with base standards

6.1 Minimal conditions for Basic profile use

7 Basic profile specifications

7.1 Introduction
7.2 Project Management process specification
7.2.1 Project Management purpose
7.2.2 Project Management requirements
7.3 Software implementation process specification
7.3.1 Software implementation purpose
7.3.2 Software implementation requirements

Annex A (normative) Basic profile base document references

A.1 Introduction
A.2 Profile requirements definition and composition references
A.2.1 PM Process — Project Management
A.2.2 SI process — Software implementation

Annex B (informative) VSE Basic profile PRM

B.1 Introduction
B.2 Overview
B.3 Project Management (PM) process
B.3.1 Project Management purpose
B.3.2 Project Management process outcomes
B.4 Software Implementation (SI) process
B.4.1 Software Implementation purpose
B.4.2 Software Implementation outcomes
B.5 Statement of conformity
B.5.1 General
B.5.2 Requirements for process reference models
