ISO/IEC 23091-3:2018 (E)

Information technology — Coding-independent code points — Part 3: Audio

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Code points and usage

4.1 General
4.2 Applicability

5 Principles for definition and referencing of code points

5.1 Code point encoding and defaults
5.2 Externally defined values
5.3 Reference format
5.4 Uniform Resource Name format

6 Audio code point definitions

6.1 Loudspeaker index and speaker channel position
6.2
6.2 Loudspeaker layout index and channel configuration
6.3 Loudspeaker positioning
6.4 Program loudness level
6.5 Anchor loudness level
6.6 Range of loudness
6.7 Top of loudness range
6.8 Maximum of momentary loudness level
6.9 Maximum of short-term loudness level
6.10 Short-term loudness level
6.11 Peak level
6.12 Compressor characteristic
