ISO/IEC/IEEE 8802-1AC:2018-04 (E)

Information technology - Telecommunications and information exchange between sy stems - Local and metropolitan area networks - Part 1AC: Media access control (MAC) service definition

Contents

1.Scope ... 13

2.Normative references ... 14

3.Definitions ... 15

3.1 Basic reference model definitions ... 15
3.2 Service conventions definitions ... 15

4.Acronyms and abbreviations ... 16

5.Conformance ... 17

5.1 Translation between media using different protocol discrimination methods ... 17
5.2 Support of the ISS by different MAC procedures ... 17

6.Conventions ... 18

6.1 General considerations ... 18
6.2 Parameters ... 18

7.Basic architectural concepts and terms ... 19

7.1 Protocol entities, peers, layers, services, and clients ... 19
7.2 Service interface primitives, parameters, and frames ... 19
7.3 Layer management interfaces ... 20
7.4 Service access points, interface stacks, and ports ... 20
7.5 MAC method independent protocols and shims ... 21
7.6 MAC Service clients ... 21
7.7 Stations and systems ... 21
7.8 Connectionless connectivity ... 22

8.Overview of the MAC Service ... 23

9.Model of the MAC Service ... 24

9.1 Model of a MAC connectionless-mode transmission ... 24
9.2 Service provided by the connectionless-mode MAC Service ... 24

10.Quality of connectionless-mode service ... 25

10.1 Determination of QoS for connectionless-mode service ... 25
10.2 Definition of connectionless-mode QoS parameters ... 25

11.Internal Sublayer Service ... 26

11.1 Service primitives and parameters ... 26
11.2 Status parameters ... 28
11.3 Point-to-point parameters ... 28
11.4 Control primitives and parameters ... 29

12.Protocol discrimination and media ... 30

12.1 M_UNITDATA.request data transformation for LPD media ... 30
12.2 M_UNITDATA.indication data transformation for LPD media ... 30

12.3 Tags in end stations 31

13.Support of the Internal Sublayer Service by specific MAC procedures 32

13.1 Ethernet convergence function 32
13.2 Wireless LAN convergence function 33
13.3 WirelessMAN convergence function 36
13.4 Resilient Packet Ring convergence function 37
13.5 Mobile Broadband Wireless Access Method convergence function 39
13.6 Point-to-Multipoint Network convergence function 40

14.MAC Service 42

14.1 Function 42
14.2 Service primitives and parameters 42
14.3 Status parameters 43
14.4 Sequence of primitives 43

Annex A (informative) Bibliography 44

Annex B (informative) Support of the Internal Sublayer Service by specific MAC procedure 45
