ISO/IEC 20933:2019 (E)

Information technology — Distributed application platforms and services (DAPS) — Framework for distributed real-time access systems

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions and acronyms

4 Conformance

5 Overview

6 Transaction

7 Time stamping function

8 Module

- 8.1 Policy module
- 8.2 Access-point module
- 8.3 RED module
- 8.4 Processing module
- 8.5 Storage module

9 Messages of each interface

- 9.1 Messages of Policy interface
- 9.2 Message of Access interface
- 9.3 Messages of Processing interface
- 9.4 Messages of Storage interface

10 Messages of external interfaces

- 10.1 Access request from external interface (In)
- 10.2 Final result notification to external interface (Out)
- 10.3 Time stamp notification

11 Access system performance management

- 11.1 Transaction processing time
- 11.2 Request performance time
- 11.3 Module processing time
- 11.4 Data transmission time
- 11.5 Request performance time for retrieve
- 11.6 Module processing time for retrieve
- 11.7 Data transmission time for retrieve
- 11.8 Request performance time for store
- 11.9 Module processing time for store
- 11.10 Data transmission time for store
- 11.11 Access point processing time

Annex A (informative) Service access control system

Annex B (informative) Share information between different Access systems

Annex C (informative) Usage of time stamping

Annex D (informative) List of messages

D.1 Messages of each interface
D.2 Messages of external interface
