ISO/IEC 26560:2019 (E)

Software and systems engineering — Tools and methods for product line product management

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and Definitions

4 Abbreviated terms

5 Reference model for product line product management

5.1 Overview
5.2 Product management enablement
5.3 Product management operation
5.4 Product management support

6 Product management enablement

6.1 General
6.2 Product management planning
6.2.1 Principal constituents
6.2.1.1 Purpose
6.2.1.2 Inputs
6.2.1.3 Outcomes
6.2.1.4 Tasks
6.2.2 Establish product management goals
6.2.3 Define key procedures for product management
6.2.4 Define schedules and required resources for product management
6.2.5 Specify how to monitor, measure and control the effectiveness of a product family
6.2.6 Document the product management plan
6.3 Product management enabling
6.3.1 Principal constituents
6.3.1.1 Purpose
6.3.1.2 Inputs
6.3.1.3 Outcomes
6.3.1.4 Tasks
6.3.2 Establish governance policy for end-to-end product lifecycle
6.3.3 Mobilize qualified human resources for end-to-end product lifecycle
6.3.4 Identify infrastructure and resource needs for end-to-end product lifecycle
6.3.5 Enable quality assurance measurement for end-to-end product lifecycle
6.3.6 Improve product management process continuously
6.4 Product management managing
6.4.1 Principal constituents
6.4.1.1 Purpose
6.4.1.2 Inputs
6.4.1.3 Outcomes
6.4.1.4 Tasks
6.4.2 Tailor and allocate governance policy, R & R and resources to relevant sub functions of product management
6.4.3 Collect data from product management sub functions
6.4.4 Monitor, measure and control product management operation and support
6.4.5 Manage actual operation and support of product management

6.4.6 Provide feedback to planning and enabling functions of product management

7 Product management operation

7.1 General
7.2 Market definition for product family
7.2.1 Principal constituents
7.2.1.1 Purpose
7.2.1.2 Inputs
7.2.1.3 Outcomes
7.2.1.4 Tasks
7.2.2 Define types of market segmentation for a product family
7.2.3 Compile the voice of customers for each market segment
7.2.4 Analyse competitors' profile for each market segment
7.2.5 Forecast trends in sales for each market segment
7.2.6 Analyse market opportunities for each market segment
7.2.7 Document market definition results
7.3 Technology scanning for product family
7.3.1 Principal constituents
7.3.1.1 Purpose
7.3.1.2 Inputs
7.3.1.3 Outcomes
7.3.1.4 Tasks
7.3.2 Identify key technology for product family
7.3.3 Analyse technology impacts on product family
7.3.4 Analyse competitors' profile of key technology
7.3.5 Forecast evolution trends in key technology
7.3.6 Evaluate strategic alternatives for competitiveness through key technology
7.3.7 Formulate technology roadmap for product family
7.4 Product family definition
7.4.1 Principal constituents
7.4.1.1 Purpose
7.4.1.2 Inputs
7.4.1.3 Outcomes
7.4.1.4 Tasks
7.4.2 Identify high-level domain
7.4.3 Identify initial candidate members of product family
7.4.4 Define initial functional and non-functional characteristics of product family
7.4.5 Analyse high-level commonality
7.4.6 Analyse high-level variability
7.4.7 Document initial product family
7.5 Trade-off analysis for product family
7.5.1 Principal constituents
7.5.1.1 Purpose
7.5.1.2 Inputs
7.5.1.3 Outcomes
7.5.1.4 Tasks
7.5.2 Formulate the trade-off analysis team
7.5.3 Identify vested stakeholders
7.5.4 Identify key decision factors and criteria for viable product family
7.5.5 Perform trade-off analysis using scenarios
7.5.6 Document trade-off analysis results of product family
7.6 Product family evolution
7.6.1 Principal constituents
7.6.1.1 Purpose
7.6.1.2 Inputs
7.6.1.3 Outcomes
7.6.1.4 Tasks
7.6.2 Monitor changing trends of business, technology and competitiveness of product family
7.6.3 Trigger the initiation decision of a product family evolution process
7.6.4 Monitor the progress of the product family evolution process
7.6.5 Evaluate the result of the product family evolution

8 Product management support

8.1 General
8.2 Role management in product management
8.2.1 Principal constituents
8.2.1.1 Purpose
8.2.1.2 Inputs
8.2.1.3 Outcomes
8.2.1.4 Tasks
8.2.2 Identify and structure roles and responsibilities for product management
8.2.3 Coordinate identified roles and responsibilities with the organization structure
8.2.4 Guide the execution of roles and responsibilities in product management
8.2.5 Assign the roles and responsibilities of product management
8.2.6 Monitor, measure and control the roles and responsibilities of product management
8.2.7 Improve the structure of roles and responsibilities in product management
8.3 Decision support in product management
8.3.1 Principal constituents
8.3.1.1 Purpose
8.3.1.2 Inputs
8.3.1.3 Outcomes
8.3.1.4 Tasks
8.3.2 Establish decision support policy for product management
8.3.3 Tailor decision procedure for product management
8.3.4 Guide the decision execution for product management
8.3.5 Document the rationale for decisions concerning product management
8.3.6 Learn from decision results of product management
8.4 Risk management in product management
8.4.1 Principal constituents
8.4.1.1 Purpose
8.4.1.2 Inputs
8.4.1.3 Outcomes
8.4.1.4 Tasks
8.4.2 Identify risks related to the platform and variability in a product family
8.4.3 Assess the identified risks related to the platform and variability
8.4.4 Develop mitigation plans for the risks
8.4.5 Monitor the execution of the mitigation plan
8.4.6 Learn from actual results of the execution

Annex A (informative) Relationships between product management and other key roles in SSPL

Annex B (informative) Exemplary analysis methods for trade-offs
