

ISO/IEC 15938-15:2019 (E)

Information technology — Multimedia content description interface — Part 15: Compact descriptors for video analysis

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Abbreviated terms, operators, mnemonics, functions and symbols
4.1	General
4.2	Abbreviated terms
4.3	Arithmetic operators
4.4	Logical operators
4.5	Relational operators
4.6	Bitwise operators
4.7	Interval specification
4.8	Mnemonics
4.9	Functions
4.10	Symbols
5	CDVA bitstream syntax
5.1	CDVA descriptor
5.1.1	Binary representation syntax
5.1.2	Descriptor component semantics
5.2	CDVA header
5.2.1	Binary representation syntax
5.2.2	Descriptor component semantics
5.3	Segment header
5.3.1	General
5.3.2	Binary representation syntax
5.3.3	Descriptor component semantics
5.4	Global descriptor
5.4.1	Binary representation syntax
5.4.2	Descriptor component semantics
5.5	Local descriptor
5.5.1	General
5.5.2	Local feature descriptor
5.5.2.1	Binary representation syntax
5.5.2.2	Descriptor component semantics
5.5.3	Local descriptor locations
5.5.3.1	General
5.5.3.2	Binary representation syntax
5.5.3.3	Descriptor component semantics
5.6	Deep feature descriptor
5.6.1	Binary representation syntax
5.6.2	Descriptor component semantics
6	CDVA descriptor
6.1	Components
6.1.1	General
6.1.2	Global descriptor

- 6.1.2.1 Global descriptors of key frames
- 6.1.2.2 Temporal encoding of global descriptors
 - 6.1.2.2.1 General
 - 6.1.2.2.2 ABAC encoding
 - 6.1.2.2.3 ABAC decoding
- 6.1.3 Local descriptor
 - 6.1.3.1 Local feature descriptors of key frames
 - 6.1.3.2 Temporal encoding of local feature descriptors
 - 6.1.3.3 Encoding of local feature locations
- 6.1.4 Deep feature descriptor
 - 6.1.4.1 Deep feature descriptors of key frames
 - 6.1.4.2 Temporal encoding of deep feature descriptors
- 6.2 Encoding procedure
 - 6.2.1 General
 - 6.2.2 Normative steps
 - 6.2.2.1 Extract SCFV descriptor
 - 6.2.2.2 Extract CDVS local descriptor
 - 6.2.2.3 Extract deep feature descriptor
 - 6.2.2.4 Determine encoding order
 - 6.2.2.5 Determine global descriptor differences
 - 6.2.2.6 Encode global descriptor
 - 6.2.2.7 Collect and filter local descriptors
 - 6.2.2.8 Encode local descriptors
 - 6.2.2.9 Determine deep feature descriptor differences
 - 6.2.2.10 Encode deep feature descriptor
 - 6.2.2.11 Serialization
 - 6.2.3 Informative steps
 - 6.2.3.1 Sampling
 - 6.2.3.2 Temporal segmentation
 - 6.2.3.3 Verification of segmentation using SCFV
 - 6.2.3.4 Determine representative frame

Annex A (normative) Recommended parameter values

Annex B (normative) Parameters of the deep feature extraction process

- B.1 CNN for deep feature extraction
- B.2 Mean NIP vector for binarization of deep feature descriptors
