Page

Foreword v

Introduction VI

Section 1: General 1

1 Scope 1

2 Conformance 3

3 Normative reference 3

4 Definitions 4

5 Abbreviations and symbols 7
5.1 Abbreviations 7
5.2 Symbols 8

Section 2: Principles of measurement and rating 10

6 The measurement 10
6.1 Configuration requirements 10
6.2 User emulation 10
6.2.1 Random user behaviour 10
6.2.2 Remote terminal emulator 10
6.2.3 Workload parameter set 11
6.2.4 Parameter set for proving the accuracy of the user emulation 11
6.3 The measurement procedure 12
6.3.1 The time phases of the measurement procedure 12
6.3.2 Writing a measurement logfile 13
6.3.3 Writing a computation result file 13
6.4 Proof of validity of the measurement 13
6.4.1 Proof of the CBSS's computational correctness 13
6.4.2 Proof of the remote terminal emulator's accuracy 13
6.4.3 Proof of the measurement result's statistical significance 13

7 Calculation of the performance values of the SUT 14
7.1 Mean execution time 14
7.2 Throughput 14
7.3 Timely throughput 14

8 Basic data for rating 14
8.1 User requirements 14
8.2 The reference environment for rating software efficiency 14
8.2.1 Reference environment for assessing application software efficiency 15
8.2.2 Reference environment for assessing system software efficiency 15

9 Rating the Performance values 15
9.1 Computing the performance reference values 15
9.1.1 Mean execution time reference values 15
9.1.2 Throughput reference values 15
9.2 Computing the performance rating values 15

9.2.1 The mean execution time rating values 15
9.2.2 Throughput rating values 15
9.2.3 The timeliness rating values 16
9.3 Rating the overall performance of the SUT 16
9.4 Assessment of performance 17
9.4.1 The steps of assessment process 17
9.4.2 Weak reference environment 17

Section 3: Detailed procedure for measurement and rating 18

10 Input requirements 18
10.1 The SUT description 18
10.1.1 Specification of the hardware architecture and configuration 18
10.1.2 Specification of the system software configuration 18
10.1.3 The application programs 19
10.1.4 Additional software required for the measurement run 19
10.1.5 The stored data 19
10.1.6 Additional information for proof 19
10.2 The workload parameter set 19
10.2.1 The activity types 19
10.2.2 Activity input variation 20
10.2.3 The task types with timeliness function and task mode 20
10.2.4 The chain types and their frequencies 21
10.2.5 Preparation times' mean values and their standard deviations 21
10.3 Input for measurement validation 22
10.3.1 Correct computation results 22
10.3.2 Variation of input data and its resulting output 22
10.3.3 Criteria for precision of working of the RTE 22
10.3.4 Criteria for statistical validity of results 22

11 The measurement 22
11.1 The measurement procedure 22
11.2 Individual rating interval 23

12 Output from measurement procedure 25
12.1 Measurement logfile 25
12.2 Computation result file 25

13 Validation of measurements 26
13.1 Validation of the computational correctness of the SUT 26
13.2 Validation of the accuracy of the RTE 26
13.2.1 Validity test by checking the relative chain frequencies 26
13.2.2 Validity test by checking the preparation times 26
13.3 Validation of the statistical significance of the measured mean execution time 27

14 Calculation of the performance values of the SUT 28
14.1 Mean execution time 28
14.2 Throughput 28
14.3 Timely throughput 28

15 Rating the measured Performance values of the SUT 29
15.1 Specification of rating level 29
15.2 Computing performance reference values 29
15.2.1 Mean execution time reference values 29
15.2.2 Throughput reference values 29
15.3 Computing rating values 29
15.3.1 Computing mean execution time rating values 29
15.3.2 Computing throughput rating values 30
15.3.3 Computing timeliness rating values 30
15.4 Rating 30
15.4.1 Mean execution time rating 30
15.4.2 Throughput rating 31

15.4.3 Timeliness rating 31
15.4.4 Overall rating 31

Annex A (normative) Specification of the RTE's basic functions 32

Annex B (normative) Additional calculation formulas 33

Annex C (normative) Format of the workload description 41

Annex D (normative) Format of the logfile 45

Annex E (informative) Utility programs 46

Annex F (informative) Examples of workloads 48
