

ISO/IEC/IEEE 8802-1CM:2019-07 (E)

Telecommunications and information exchange between information technology systems - Requirements for local and metropolitan area networks - Part 1CM: Time-sensitive networking for fronthaul

Contents	Page
1. Overview	10
1.1 Scope.....	10
1.2 Purpose.....	10
1.3 Introduction.....	10
2. Normative references	12
3. Definitions	13
4. Acronyms and abbreviations	14
5. Conformance	16
5.1 Requirements terminology.....	16
5.2 Profile Conformance Statement (PCS).....	16
5.3 Bridge requirements.....	16
5.4 Bridge options.....	17
5.5 End station requirements	18
5.6 End station options.....	18
6. Fronthaul	20
6.1 Evolved Universal Terrestrial Radio Access background.....	21
6.2 Class 1 requirements.....	21
6.3 Class 2 requirements.....	23
6.4 Synchronization requirements	26
7. Bridge and synchronization functions	31
7.1 Latency components	31
7.2 Bridge delay calculation	31
7.3 Frame preemption.....	33
7.4 Network synchronization.....	33
7.5 Flow control.....	37
7.6 Energy Efficient Ethernet	37
8. Fronthaul profiles	39
8.1 Profile A.....	40
8.2 Profile B.....	42
9. Synchronization solutions	44
9.1 Solution for Category A+	44
9.2 Solutions for Category A	44
9.3 Solutions for Category B	44
9.4 Solutions for Category C	44
Annex A (normative) PCS proforma—Time-Sensitive Networking for Fronthaul Profiles.....	45
Annex B (informative) Delay calculation examples.....	55
Annex C (informative) Bibliography.....	59
