ISO/IEC TS 23167:2020-02 (E)

Information technology - Cloud computing - Common technologies and techniques

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols and abbreviated terms 4

5 Overview of common technologies and techniques used in cloud computing 4
5.1 General 4
5.2 Technologies 5
5.2.1 General 5
5.2.2 Infrastructure capabilities type of cloud services 5
5.2.3 Platform capabilities cloud services 6
5.2.4 Application capabilities type cloud services 6
5.3 Techniques 6

6 Virtual machines and hypervisors 6
6.1 General 6
6.2 Virtual machines and system virtualization 7
6.3 Hypervisors 7
6.3.1 General 7
6.3.2 Type I hypervisors 8
6.3.3 Type II hypervisors 8
6.4 Security of VMs and hypervisors 9
6.5 VM images, metadata and formats 10

7 Containers and container management systems (CMSs) 11
7.1 General 11
7.2 Containers and operating system virtualization 11
7.2.1 Description of containers 11
7.2.2 Container daemon 12
7.2.3 Container resources, isolation and control 13
7.3 Container images and filesystem layering 14
7.3.1 Image purpose and content 14
7.3.2 Filesystem layering 15
7.3.3 Container image repositories and registries 16
7.4 Container management systems (CMSs) 17
7.4.1 General 17
7.4.2 Common CMS capabilities 17

8 Serverless computing 19
8.1 General 19
8.2 Functions as a service 20
8.2.1 Overview 20
8.2.2 Functions within FaaS 20
8.2.3 Serverless frameworks 21
8.2.4 FaaS relationship to microservices and containers 21

8.3 Serverless databases 22

9 Microservices architecture 22
9.1 General 22
9.2 Advantages and challenges of microservices 23
9.3 Specification of microservices 25
9.4 Multi-layered architecture 25
9.5 Service mesh 28
9.6 Circuit breaker 30

9.7 API gateway 30

10 Automation 30
10.1 General 30
10.2 Automation of the development lifecycle 31
10.3 Tooling for automation 31

11 Architecture of PaaS systems 32
11.1 General 32
11.2 Characteristics of PaaS systems 33
11.3 Architecture of components running under PaaS system 35

12 Data storage as a service 36
12.1 General 36
12.2 Common features of DSaaS 37
12.3 Capabilities type of DSaaS 40
12.4 Significant additional capabilities of DSaaS 40

13 Networking in cloud computing 41
13.1 Key aspects of networking 41
13.2 Cloud access networking 41
13.3 Intra-cloud networking 42
13.4 Virtual private networks (VPNs) and cloud computing 43

14 Cloud computing scalability 44
14.1 Scalability approaches 44
14.2 Parallel instances and load balancing 45
14.3 Elasticity and automation 46
14.4 Database scaling 46

15 Security and the cloud common technologies 47
15.1 General 47
15.2 Firewalls 47
15.3 Endpoint protection 47
15.4 Identity and access management 47
15.5 Data encryption 48
15.6 Key management 48

Annex A (informative) VM Images and disk images 49
