

# ISO/IEC TR 30164:2020-04 (E)

## Internet of things (IoT) - Edge computing

---

<b>Contents</b>	<b>Page</b>
FOREWORD.....	4
1 Scope.....	5
2 Normative references .....	5
3 Terms and definitions .....	5
4 Abbreviated terms .....	6
5 Overview .....	8
5.1 General.....	8
5.2 Common concepts .....	8
5.3 General concepts of edge computing .....	9
5.4 Example characteristics of edge computing.....	12
5.5 Stakeholders.....	12
6 Viewpoints.....	14
6.1 Conceptual viewpoint.....	14
6.2 Technology viewpoint.....	15
6.2.1 General .....	15
6.2.2 Cloud computing.....	15
6.2.3 Centralized data centres .....	16
6.2.4 Micro data centre.....	18
6.2.5 Real-time in edge computing .....	18
6.2.6 Heterogeneous computing .....	19
6.2.7 Software defined network (SDN).....	20
6.2.8 Lightweight operating systems.....	20
6.3 Functional viewpoint .....	20
6.3.1 General .....	20
6.3.2 Data interoperability .....	21
6.3.3 Networking .....	22
6.3.4 Security and privacy .....	22
6.4 Deployment viewpoint.....	26
6.4.1 General .....	26
6.4.2 Edge computing three-tier deployment model .....	26
6.4.3 Edge computing four-tier deployment model .....	27
7 Use cases .....	28
7.1 General.....	28
7.2 Smart elevator .....	29
7.2.1 Description of the use case .....	29
7.2.2 Diagram of the use case .....	29
7.2.3 Technical details.....	30
7.3 Smart video monitoring .....	30
7.3.1 Description of the use case .....	30
7.3.2 Diagram of the use case .....	31
7.3.3 Technical details.....	31

7.4	Intelligent transportation systems.....	32
7.4.1	Description of the use case .....	32
7.4.2	Diagram of the use case .....	33
7.4.3	Technical details.....	34
7.5	Process control in the smart factory .....	34
7.5.1	Description of the use case .....	34
7.5.2	Diagram of the use case .....	35
7.5.3	Technical details.....	36
7.6	Centralized monitoring of power plants (CMPP) .....	36
7.6.1	Description of the use case .....	36
7.6.2	Diagram of the use case .....	37
7.6.3	Technical details.....	38
7.7	Automated crop monitoring and management system.....	38
7.7.1	Description of the use case .....	38
7.7.2	Diagram of the use case .....	40
7.7.3	Technical details.....	40
7.8	Smart lighting system.....	41
7.8.1	Description of the use case .....	41
7.8.2	Diagram of the use case .....	42
7.8.3	Technical details.....	43
	Bibliography.....	45
	Figure 1 – IoT edge computing conceptual model .....	14
	Figure 2 – Container virtualization on a host system .....	17
	Figure 3 – Lightweight OS architecture .....	20
	Figure 4 – Software defined network architecture.....	22
	Figure 5 – Edge computing three-tier deployment model.....	27
	Figure 6 – Edge computing four-tier deployment model.....	28
	Figure 7 – Concept of a smart elevator .....	30
	Figure 8 – Concept of video monitoring with edge computing.....	31
	Figure 9 – Concept of intelligent transportation systems with edge computing .....	34
	Figure 10 – Example concept of the smart factory using IIoT .....	36
	Figure 11 – Concept of centralized monitoring of power plants.....	38
	Figure 12 – Concept of automated crop monitoring and management system .....	40
	Figure 13 – Logical model: connectivity between various components .....	42
	Figure 14 – Deployment model: single IoT gateway controlling multiple smart lights .....	43
	Table 1 – Example networking table.....	10
	Table 2 – Capabilities of some IoT entities.....	11
	Table 3 – Technical details of the elements in the smart elevator use case.....	30
	Table 4 – Technical details of the elements in the video monitoring use case .....	32
	Table 5 – Technical details for the intelligent transportation use case .....	34
	Table 6 – Technical details for the smart factory use case .....	36
	Table 7 – Technical details of the CMPP use case.....	38
	Table 8 – Technical details of automated crop monitoring and management system .....	40
	Table 9 – Technical details of the smart lighting use case.....	44
