Internet of things (IoT) - Interoperability for IoT systems - Part 2: Transport interoperability

Contents

Page

FOREWORD 3
INTRODUCTION 4
1 Scope 5
2 Normative references 5
3 Terms and definitions 5
4 Network connectivity for transport interoperability 6
5 Overview 7
5.1 Network connectivity model and interfaces between IoT systems 7
5.2 Network connectivity model and interfaces within an IoT system 8
5.3 Network connectivity stack model 10
6 Requirements for network connectivity between IoT systems 12
6.1 Overview 12
6.2 Network interfaces between different IoT systems 13
6.2.1 Network service interface 13
6.2.2 Network protocol translation interface 13
6.2.3 Network resource interface 13
6.3 Requirements of network connectivity 13
6.3.1 General 13
6.3.2 Service-related requirement 13
6.3.3 Communication-related requirement 14
6.3.4 Network resource-related requirement 14
6.3.5 QoS requirement 14
6.3.6 Bandwidth requirement 15
6.3.7 Signalling requirement 15
6.3.8 Status monitor requirement 15
6.3.9 Security requirement 15
6.3.10 Time-dependent requirement 15
7 Requirements for network connectivity within an IoT system 15
7.1 Overview 15
7.2 Network elements for supporting network connectivity 16
7.2.1 Network service interface 16
7.2.2 Network protocol translation interface 17
7.2.3 Network resource interface 17
7.3 Gateways for supporting network connectivity 17
Bibliography 18
