

# ISO/IEC TR 22981:2020 (E)

## Information technology — Office equipment — Guidelines for the development of an ontology (vocabulary, components and relationships) for office equipment

---

### Contents

|         |  |
|---------|--|
|         | Foreword   |
|         | Introduction   |
| 1       | Scope  |
| 2       | Normative references                                       |
| 3       | Terms and definitions                                      |
| 4       | Key concepts and current activities                        |
| 4.1     | General  |
| 4.2     | Virtualisation of physical objects and processes           |
| 4.3     | Big data and artificial intelligence                       |
| 4.4     | Peer-to-peer communication and smart contracts             |
| 4.5     | Identification and authorisation                           |
| 4.6     | Ontology development                                       |
| 5       | Steps in the development of an [office] ontology           |
| 5.1     | Selection of appropriate tools                             |
| 5.2     | Identification of elements                                 |
| 5.3     | Relationship to existing ontologies                        |
| 5.4     | Other vocabularies and standards development organisations |
| 5.5     | Example of automated communication                         |
| 5.6     | Vocabulary specification                                   |
| Annex A | (informative) Basic RDF concept                            |
| A.1     | General  |
| A.2     | RDF graph  |
| A.3     | Example  |
