

ISO/IEC 21122-5:2020 (E)

Information technology — JPEG XS low-latency lightweight image coding system — Part 5: Reference software

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms, definitions and abbreviated terms
3.1	Terms and definitions
3.2	Abbreviated terms
4	Conventions
4.1	Operators
4.2	Typesetting
5	Reference software
5.1	Purpose
5.2	Examples of use
5.3	Layout of this document
6	Copyright, licensing and intellectual property
Annex A	(informative) Unpacking and compiling the reference software
A.1	Unpacking the software
A.2	Prerequisites for building the software
A.2.1	Prerequisites for building the software under a POSIX® compliant system
A.2.2	Prerequisites for building the software under Windows™
A.3	Compiling the software
A.3.1	Compiling the software under a POSIX® compliant operating system
A.3.2	Compiling the software under Windows™
Annex B	(informative) File formats read and written by the reference software
B.1	General
B.2	ppm format
B.2.1	ppm capabilities
B.2.2	Description of the ppm header
B.2.3	Description of the ppm body
B.3	yuv format description
Annex C	(informative) Using the reference software
C.1	General
C.2	Running the sample software encoder
C.3	Running the reference software decoder
