# ISO/IEC TR 23843:2020 (E)

## Information technology for learning, education and training — Catalogue model for virtual, augmented and mixed reality content

## Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Abbreviated terms

5 Background

- 5.1 Metadata for digital content
- 5.2 Characteristics of VR/AR/MR content
- 5.3 Actors and roles
- 5.4 Video games as the reference model
- 5.5 Application of game metadata

6 Catalogue model for VR/AR/MR content

- 6.1 ADDIE model
- 6.1.1 General
- 6.1.2 Analyse
- 6.1.3 Design
- 6.1.4 Develop
- 6.1.5 Implement
- 6.1.6 Evaluate
- 6.2 Requirements for the catalogue model
- 6.2.1 General
- 6.2.2 Content entity
- 6.2.3 Platform entity
- 6.2.4 Local release entity
- 6.2.5 Distribution package entity
- 6.2.6 Additional content entity
- 6.2.7 Agent entity

Annex A (informative) Related metadata models

- A.1 ISO/IEC 23005 series (MPEG-V)
- A.2 Metadata encoding and transmission standard (METS)
- A.3 VRA Core
- A.4 CRMdig: a model for provenance metadata
- A.5 Video game metadata schema (VGMS) version 4.0
