ISO/IEC 9594-6:2020-11 (E)

Information technology - Open systems interconnection - Part 6: The Directory: Selected attribute types

Contents

		Page
1	Scope	1
2	Normative references	1
2.1	Identical Recommendations | International Standards	1
2.2	Other references	2
2.3	ISO/IEC Standards	3
3	Definitions	3
4	Abbreviations	3
5	Conventions	4
6	Definition of selected attribute types	5
6.1	System attribute types	5
6.2	Labelling attribute types	5
6.3	Geographical attribute types	10
6.4	Organizational attribute types	12
6.5	Explanatory attribute types	13
6.6	Postal addressing attribute types	15
6.7	Telecommunications addressing attribute types	17
6.8	Preferences attribute types	20
6.9	OSI application attribute types	21
6.10	Relational attribute types	22
6.11	Domain attribute types	23
6.12	Hierarchical attribute types	23
6.13	Attributes for applications using tag-based identification	24
6.14	Simple Authentication attributes held by object entries	28
6.15	Password policy attributes	30
6.16	Notification attributes	34
6.17	LDAP defined attribute types	39
7	String preparation	40
7.1	Transcode	40
7.2	Map	40
7.3	Normalize	40
7.4	Prohibit	40
7.5	Check bidi	41
7.6	Insignificant Character Removal	41
8	Definition of matching rules	41
8.1	String matching rules	41
8.2	Syntax-based matching rules	44
8.3	Time matching rules	47
8.4	First component matching rules	49
8.5	Word matching rules	49
8.6	Approximate Matching Rules	52
8.7	Special Matching Rules	52
8.8	Zonal Match	53
8.9	Identity matching rules	56
8.10	Password policy matching rules	57
8.11	LDAP defined matching rules	58
9	Definition of syntaxes	59

9.1 Directory syntaxes 59
9.2 IETF syntaxes 60
10 Definition of Context Types 66
10.1 Language Context 66
10.2 Temporal Context 66
10.3 Locale Context 70
10.4 LDAP Attribute Option Context 70
Annex A – Selected attribute types in ASN.1 72
Annex B – Attribute types for password policy in ASN.1 103
Annex C – Upper bounds 109
Annex D – Alphabetical index of attributes, matching rules and contexts 110
Annex E – Examples for zonal match matching rules 113
Annex F – Mapping Object Identifiers and Uniform Resource Names into Distinguished Names 116
F.1 Scope of this annex 116
F.2 Object identifier resolution 116
F.3 Uniform Resource Name (URN) resolution 117
Annex G – Object identifier based Directory names 120
G.1 Scope of this annex 120
G.2 Transformation of object identifiers into Directory names 120
G.3 The use of object-identifier-based Directory names 120
Annex H – Amendments and corrigenda 122
